Where is your hard earned money? Whether you have a savings or checking account, a 401(k), an IRA, a college fund, or dollars stuffed under the mattress, you are an investor. But you are losing every day that you sit back and let others make decisions about your money. You worked hard for it, and it's your responsibility to make it work for you. If you don't invest smartly, your very financial future is in jeopardy. But smart investing is not nearly as difficult or complicated as some might lead you to believe. In seven simple yet vital steps Dan Solin, New York Times bestselling author of The Smartest Investment Book You'll Ever Read, takes the mystery out of successful investing and shows everyone, no matter what their income or expertise in money matters, how to take control of their financial lives, ignore the "experts", and grow a nest egg. Solin's approach mirrors that of the most successful investors in the world. He ignores the bombast of so many advisors and brokers who over-promise and under-deliver, relying instead on objective, historical, peer-reviewed data. Solin helps you separate fact from hype so that you can make intelligent, responsible investing decisions. And his simple, clear-headed advice shows you exactly how to invest your assets with an easy-to-follow plan that allows you to create and monitor your portfolio in less time than it takes to read the morning paper.

How do you fall back in love? This was the underlying problem of one in four couples seeking help from relationship therapist Andrew G. Marshall. They described their problem as: 'I love you but I'm not in love with you'. Noticing how widespread the phenomenon had become, he decided to look more closely. Why were these relationships becoming defined more by companionship than by passion, and why was companionship no longer enough? From his research Andrew has devised his own unique programme. By looking at how a couple communicate, argue, share love, take responsibility, give and learn he offers in seven steps a reassuring and empowering map for how two individuals can better understand themselves, strengthen their bond and recover that lost magic.

One in four people have heard it or have said it. . . . Now discover what it really means. If the relationship you have with your significant other is defined more by companionship than passion . . . if you love each other deeply but are not deeply in love . . . if you feel that something's missing or is no longer there . . . then you could be experiencing ILYB (I Love You, But . . .). In I Love You, but I'm Not in Love with You --a real-life relationship guide from couples' counselor Andrew G. Marshall--partners and individuals who have "fallen out of love" or want to rekindle the love that once was will learn how to use Marshall's program with impressive results. This is a much-needed book to help men and women of all ages in any type of committed romantic relationship to truly understand love and to point out the everyday habits that undermine growing together. Marshall's research is one of the few that delves into what causes relationships to "cool" or for emotions to be "dulled." So much more than a quick-fix guide, I Love You, but I'm Not In Love with You empowers couples to emerge with a better understanding of themselves and each other, and ultimately build a stronger, more passionate bond. Learn how to: • Argue productively and address the core of the issue • Employ the trigger words for more effective communication • Find a balance between being fulfilled as an individual and being one half of a couple • Discover if the ILYB is simply a symptom of a workable problem • Take your sex life to a deeper level of intimacy • Create new bonds instead of searching for the old ones

This book presents Lee Baucom's system for saving your marriage in three easy steps: connecting with your spouse, changing yourself, and creating a new path.

Dr. David Stevens new book, Falling Back in Love is ideal for any couple--whether married, engaged, or dating for any considerable time. Unlike other authors who may write about relationships, Stevens has lived and breathed this subject-helping couples for 40+ years but more importantly, has been in a loving and caring relationship for over 50. Stevens book is not only filled with sound advice, but with examples of what it means to be in a committed relationship. As the good doctor would say Forget about trying to have a perfect marriage and strive to be perfectly married. What does this mean? After you read, Falling Back in Love you'll understand, but more importantly, you'll be able to incorporate more love into your relationships. Sheilah Brooks, writer I felt that with the divorce rate being at 50%, this book could save couples tons of money if they want to salvage a relationship. We live in such callous times when love and commitment seem almost nonexistent. Martha Tucker

An engaging, accessible citizen's guide to the seven urgent changes that will really make a difference for our climate—and how we can hold our governments accountable for putting these plans into action. Dozens of kids in Montgomery County, Maryland, agitated until their school board committed to electric school buses. Mothers in Colorado turned up in front of an obscure state panel to fight for clean air. If you think the only thing you can do to combat climate change is to install a smart thermostat or cook plant-based burgers, you're thinking too small. That's where The Big Fix comes in, offering everyday citizens a guide to the seven essential changes our communities must enact to bring our greenhouse gas emissions down to zero—and sharing stories of people who are making those changes reality. Energy policy adviser Hal Harvey and longtime New York Times reporter Justin Gillis hone in on the seven areas where ambitious but eminently practical changes will have the greatest effect: electricity production, transportation, buildings, industry, urbanization, use of land, and investment in promising new green technologies. In a lively, jargon-free style, the pair illuminate how our political economy really works, revealing who decides everything from what kind of power plants to build to how efficient cars must be before they're allowed on the road to how much insulation a new house requires—and how we can insert ourselves into all these decisions to ensure that the most climate-conscious choices are being made. At once pragmatic and inspiring, The Big Fix is an indispensable action plan for citizens looking to drive our country's greenhouse gas emissions down to zero—and save our climate.

Provides advice for couples contemplating divorce who still hope to save their marriages, and suggests ways to deal with infidelity, depression, a midlife crisis, sexual problems, and other common issues.
