The Arab conquests: 7th century: One of the most dramatic and sudden movements of any people in history is the expansion, by conquest, of the Arabs in the 7th century (only the example of the Mongols in the 13th century can match it). The desert tribesmen of Arabia form the bulk of the Muslim armies. Their natural ferocity and love of warfare, together with the sense of moral rectitude provided by their new religion, form an irresistible combination.

The history of Saudi Arabia in its current form as a state began with its foundation in 1744, although the history of the region extends as far as 20,000 years ago. The region has had a global impact twice in world history. In the 7th century it became the cradle of Islam and the capital of the Islamic Rashidun Caliphate. From the mid-20th century the discovery of vast oil deposits propelled it into a key economic and geo-political role. At other times, the region existed in relative obscurity a

A riveting, comprehensive history of the Arab peoples and tribes that explores the role of language as a cultural touchstone This kaleidoscopic book covers almost 3,000 years of Arab history and shines a light on the footloose Arab peoples and tribes who conquered lands and disseminated their language and culture over vast distances. Tracing this process to the origins of the Arabic language, rather than the advent of Islam, Tim Mackintosh-Smith begins his narrative more than a thousand years before Muhammad and focuses on how Arabic, both spoken and written, has functioned as a vital source of shared cultural identity over the millennia. Mackintosh-Smith reveals how linguistic developments--from pre-Islamic poetry to the growth of script, Muhammad's use of writing, and the later problems of printing Arabic--have helped and hindered the progress of Arab history, and investigates how, even in today's politically fractured post-Arab Spring environment, Arabic itself is still a source of unity and disunity.

THE THIRD EDITION OF THE INTERNATIONAL BESTSELLER, REVISED AND UPDATED 'A rich, galloping narrative that spans the Arab world...outstanding, gripping and exuberant...full of flamboyant character sketches, witty asides and magisterial scholarship, that explains much of what we need to know about the world today' Simon Sebag Montefiore 'Anyone who seeks to understand why the Islamic world bears a grudge against the West should read The Arabs' Sir Alastair Horne Starting with the Ottoman conquests in the sixteenth century, this landmark book follows the story of the Arabs through the era of European imperialism and the Superpower rivalries of the Cold War, to the present age of unipolar American power. Drawing on the writings and eyewitness accounts of those who lived through the tumultuous years of Arab history, The Arabs balances different voices - politicians, intellectuals, students, men and women, poets and novelists, famous, infamous and the completely unknown - to give a rich, complex sense of life over nearly five centuries. Rogan's book is remarkable for its geographical sweep, covering the Arab world from North Africa through the Arabian Peninsula, and for the depth in which it explores every facet of modern Arab history. Charting the evolution of Arab identity from Ottomanism to Arabism to Islamism, it covers themes including the conflict between national independence and foreign domination, the Arab-Israeli struggle and the peace process, Abdel Nasser and the rise of Arab Nationalism, the political and economic power of oil and the conflict between secular and Islamic values. This multilayered, fascinating and definitive work is the essential guide to understanding the history of the modern Arab world - and its future.
