Site-Specific Art charts the development of an experimental art form in an experimental way. Nick Kaye traces the fascinating historical antecedents of today's installation and performance art, while also assembling a unique documentation of contemporary practice around the world. The book is divided into individual analyses of the themes of space, materials, site, and frames. These are interspersed by specially commissioned documentary artwork from some of the world's foremost practitioners and artists working today. This interweaving of

critique and creativity has never been achieved on this scale before. Site-Specific Art investigates the relationship of architectural theory to an understanding of contemporary site related art and performance, and rigorously questions how such works can be documented. The artistic processes involved are demonstrated through entirely new primary articles from: * Meredith Monk * Station House Opera * Brith Gof * Forced Entertainment. This volume is an astonishing contribution to debates around experimental cross-arts practice.

Conservation of Easel Paintings is the first comprehensive text on the history, philosophy, and methods of treatment of easel paintings that combines both theory with practice. With contributions from an international group of experts and interviews with important artists, this volume provides an all-encompassing guide to necessary background knowledge in technical art history, artists' materials, scientific methods of examination and documentation, with sections that present varying approaches and methods for treatment, including consolidation, lining, cleaning, retouching, and varnishing. The book concludes with a section featuring issues of preventive conservation, storage, shipping, exhibition, lighting, safety issues, and public outreach. Conservation of Easel Paintings is a crucial resource in the training

of conservation students and will provide generations of practicing paintings conservators and interested art historians, curators, directors, collectors, dealers, artists, and students of art and art history with invaluable information and guidance.

"This book has been conceived as a movie on paper, and as such, can be considered a 'documentary on documentation'. Readers are invited to analyse their own reading experience throughout a set of pages, to become 'interactive on paper'; some space is intentionally provided for practice and annotation. Exercises are included to help readers consolidate new skills, through an innovative 'learning by seeing' experience." "Since history is based on documentation, every e-mail or memo we write becomes a part of our individual history. This book will be invaluable to those whose careers rest on accuracy, who need to create both succinct and clear reports and presentations."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. October 2013, and offers the reader not only a wide variety of subjects relating to the preservation of image collections, but also an overview of the different professions and practices involved in the preservation of photographic heritage. The proceedings contain some practical examples illustrating how CEN regulations and generally accepted standards can be translated into daily management. Moreover, they transcend a purely scientific debate by also questioning the value and meaning of image collections, and by offering a base for anyone dealing with photographs to think about their long-term preservation. Divided into four sections, the proceedings provide the reader with an overview of: 1) Theoretical questions relating to the meaning, value and impact of photographic collections; 2) Some examples of collection management practices, storage and exhibition of photographs; 3) Results of scientific research concerning the stability of photographic supports and their conservation treatments; 4) Digitization practices of image collections and new tools to assign content and value to historical photographs. In addition to traditional conference papers, the book also includes essays on the future of photographic collections, written by established restorers and art historians.
