Disabled people may be missing out on special parking concessions because of where they live. This is the main finding of this report into the Blue Badge Scheme, which offers parking concessions for disabled people. It comes as the Government carries out a strategic review of the scheme. The Committee found wide differences in the way the eligibility criteria are assessed by different local authorities. It wants to see more done to promote consistent good practice across the country.The Committee’s conclusions include: (1) the Committee wants to see the minimum issue period for a badge reduced from three years to one, to include those with short-term or temporary disabilities. It would also like to see “smart card” technology developed so there could be even more flexibility over the issuing of badges. (2) In cases where a blue badge holder’s condition is unlikely to improve they should not usually have to undergo regular three-yearly assessments, but have their badge renewed automatically. (3) the Government should consider including central London, which currently has its own regime, in the national system. (4) eligibility for a blue badge should be based on mobility in a wider sense than simply on an applicant’s ability to walk. But the Government should also look to more appropriate ways of helping people with other disabilities, such as bowel disease. (5) for those who knowingly abuse the scheme the Committee want to see tougher penalties. In particular, those who use stolen badges should have their vehicles impounded. A national database should also be established to help combat fraud. (6) the Security Industry Authority should take steps to prevent vehicles displaying a valid badge from being clamped when they are parked on private land. (7) the Committee also found that Asda was the only example given of a major national company which consistently fined people who abused its disabled bays.

"In considering the whole of Crane's writing, Monteiro interrelates the various texts and vividly presents their cultural contexts, structuring his study around the primary natural and social settings that uniquely characterize Crane - the city, warfare, the frontier, and shipwreck at sea. By taking an unprecedented inventory of those religious readings, songs, and recitations the young Crane imbibed and tracing their permeation of his writerly imagination, Monteiro deepens our understanding of the meaning and purpose of Crane's work and fosters new appreciation for his immense but short-lived creative faculty."--Jacket.

The Government asked all departments what more could and should be done to demonstrate commitment to the armed forces and gratitude for their service and sacrifice. This paper is the result of that process. It is designed to end any disadvantage that armed service imposes on the forces, their families and the veterans, particularly concerning movement around the country or the world. It also sets out how better to support and recognise those who have been wounded in service. The paper covers: the Armed Forces Compensation Scheme; health (including hospital and rehabilitation facilities, mental health services and veterans' needs); housing; education and skills; transport (concessionary bus travel for service personnel and blue badge entitlement for disabled veterans); support for families (childcare provision, support for bereaved families); benefits; building careers; Foreign and Commonwealth Office personnel; pay. It outlines what has been achieved already, and future action to preserve and enhance the commitment. Annexes provide supplementary information on the above areas and describe the consultation process that informed this paper.

Named one of the best nonfiction books of the year by The Washington Post " Tangled Up in Blue is a wonderfully insightful book that provides a lens to critically analyze urban policing and a road map for how our most dispossessed citizens may better relate to those sworn to protect and serve. " —The Washington Post " Remarkable . . . Brooks has produced an engaging page-turner that also outlines many broadly applicable lessons and sensible policy reforms. " —Foreign Affairs
Journalist and law professor Rosa Brooks goes beyond the "blue wall of silence" in this radical inside examination of American policing
In her forties, with two children, a spouse, a dog, a mortgage, and a full-time job as a tenured law professor at Georgetown University, Rosa Brooks decided to become a cop. A liberal academic and journalist with an enduring interest in law's troubled relationship with violence, Brooks wanted the kind of insider experience that would help her understand how police officers make sense of their world—and whether that world can be changed. In 2015, against the advice of everyone she knew, she applied to become a sworn, armed reserve police officer with the Washington, DC, Metropolitan Police Department. Then as now, police violence was constantly in the news. The Black Lives Matter movement was gaining momentum, protests wracked America's cities, and each day brought more stories of cruel, corrupt cops, police violence, and the racial disparities that mar our criminal justice system. Lines were being drawn, and people were taking sides. But as Brooks made her way through the police academy and began work as a patrol officer in the poorest, most crime-ridden neighborhoods of the nation's capital, she found a reality far more complex than the headlines suggested. In Tangled Up in Blue, Brooks recounts her experiences inside the usually closed world of policing. From street shootings and domestic violence calls to the behind-the-scenes police work during Donald Trump's 2016 presidential inauguration, Brooks presents a revelatory account of what it's like inside the "blue wall of silence." She issues an urgent call for new laws and institutions, and argues that in a nation increasingly divided by race, class, ethnicity, geography, and ideology, a truly transformative approach to policing requires us to move beyond sound bites, slogans, and stereotypes. An explosive and groundbreaking investigation, Tangled Up in Blue complicates matters rather than simplifies them, and gives pause both to those who think police can do no wrong—and those who think they can do no right.

A riveting account of espionage for the digital age, from one of America ’ s leading intelligence experts
Spying has never been more ubiquitous—or less understood. The world is drowning in spy movies, TV shows, and novels, but universities offer more courses on rock and roll than on the CIA and there are more congressional experts on powdered milk than espionage. This crisis in intelligence education is distorting public

opinion, fueling conspiracy theories, and hurting intelligence policy. In Spies, Lies, and Algorithms, Amy Zegart separates fact from fiction as she offers an engaging and enlightening account of the past, present, and future of American espionage as it faces a revolution driven by digital technology. Drawing on decades of research and hundreds of interviews with intelligence officials, Zegart provides a history of U.S. espionage, from George Washington ' s Revolutionary War spies to today ' s spy satellites; examines how fictional spies are influencing real officials; gives an overview of intelligence basics and life inside America ' s intelligence agencies; explains the deadly cognitive biases that can mislead analysts; and explores the vexed issues of traitors, covert action, and congressional oversight. Most of all, Zegart describes how technology is empowering new enemies and opportunities, and creating powerful new players, such as private citizens who are successfully tracking nuclear threats using little more than Google Earth. And she shows why cyberspace is, in many ways, the ultimate cloak-and-dagger battleground, where nefarious actors employ deception, subterfuge, and advanced technology for theft, espionage, and information warfare. A fascinating and revealing account of espionage for the digital age, Spies, Lies, and Algorithms is essential reading for anyone who wants to understand the reality of spying today.
