Major Hal Skaarup has woven together an informative and detailed synopsis of the carefully preserved and restored armoured fighting vehicles on display in Canada. He highlights the importance of these upon key turning points in history when these AFVs were in use as tools of war at home and overseas. We often associate the evolution of military prowess with the advancement of sophisticated technology. Major Skaarup's descriptions of Canadian armour as it evolved to the level it has today reveals that military planners have had to be continuously creative in adapting to the changes in modern combat. They had to devise many intricate techniques, tactics and procedures to overcome the insurgents and opposition forces faced in Afghanistan and future overseas missions where Canadian armour will be brought into play. This guide book will show the interested reader where to find examples of the historical armour preserved in Canada, and perhaps serve as a window on how Canada ' s military contribution to safety and security in the world has evolved.

After the historic D-Day landings comes the fight to liberate France and the rest of Occupied Europe. This

campaign book focuses on the push inland from the Commonwealth beaches of Gold, Sword, and Juno culminating with the battle for Caen and the Falaise Pocket. Containing new scenarios, Theatre Selectors, and units, including rules for the Canadian Army in Europe and their adversaries, this book has everything players need to continue the liberation of Europe.

Expert author Michael Green has compiled a full inventory of the armored fighting vehicles developed and deployed by the Allied armies during the six year war against Nazi Germany and her Axis partners. Tank destroyers included the US Army's M18 Hellcat and M36 Jackson, the British Archer and Achilles and the Soviets SU-85, SU-100 and SU-122. Self-propelled artillery vehicles provide indirect fire support. Examples of these were the British Bishop and Sexton, the US M7 Army Priest and The Red Army's SU-152 Beast Slayer. For reconnaissance the Allies fielded armored cars and scout cars such as the Daimler Dingo, the US M8 Greyhound and T17 Staghound, and the Russian BA-10, -20 and -64. AFVs such as the British full tracked Universal Carrier and US M3 halftracks were fitted with a range of weapon systems, such as mortars or machine guns. All these and many more AFVs are expertly described in words and captioned images in this comprehensive work which is the companion volume to the authors Allied Tanks of the Second World War.

From the scaling of Pointe-du-Hoc and the assault on Pegasus Bridge, to the landings on the Utah, Omaha, Gold, Juno, and Sword beaches, this new Campaign Book for Bolt Action allows players to take command of the Allied Forces or those of the defending Axis. Featuring new linked scenarios, rules, troop types, and Theatre Selectors, this volume provides plenty of options for both novice and veteran players looking to recreate these famous battles and begin the liberation of Europe.

Many thousands of different types of vehicles were used by the armies during the Second World War for various roles, including the fighting vehicles such as armoured cars and tanks. Today these are very popular with enthusiasts who restore these historic vehicles to their pristine state and attend specialist gatherings around the country and across Europe. This interest extends to America where there are many owners of historic vehicles. This book sets out to introduce some of the better known examples of these preserved vehicles and also some of those which are not so well known. This range includes trucks to keep the armies supplied, ambulances, motorcycles, armoured cars and of course the impressive range of tanks from the smallest to some of the largest. Some vehicles are so rare that examples have been recreated using original designs and together with the original vehicles their history is told in this book. From jeeps to tanks, landrovers to ambulances, this is the perfect book for recreating, restoring and exploring the history of these vehicles that were vital to the war effort.

An army may march on its stomach, but it needs more than hot dinners to fight. As Canadians battled through Northwest Europe in the Second World War, how did they reinforce their front lines? An Army of Never-Ending Strength provides detailed insight into the administration, structure, and troop and equipment levels of the First Canadian Army during 1944 – 45. Captain Arthur W. Gullachsen demonstrates the army's effectiveness at reinforcing its combat units and draws a powerful conclusion. The administrative and logistical capability of the Canadian Army created a constant state of offensive strength, which made a marked contribution to eventual Allied victory.

Historian and collector Michael Green shows in this fascinating and graphically illustrated book that the two wars that engulfed Indochina and North and South Vietnam over 30 years were far more armoured in nature than typically thought of. By skilful use of imagery and descriptive text he describes the many variants deployed and their contribution. The ill-fated French Expeditionary Force was largely US equipped with WW2 M3 and M5 Stuart, M4 Sherman and M24 light tanks as well as armoured cars and half-tracks. Most of

these eventually went to the Army of the Republic of Vietnam but were outdated and ineffective due to lack of logistics and training.??The US Army and Marine Corps build-up in the 1960s saw vast quantities of M48 Pattons, M113 APCs and many specialist variants and improvised armoured vehicles arrive in theatre. The Australians brought their British Centurion tanks. ??But it was the Russians, Chinese and North Vietnamese who won the day and their T-38-85 tanks, ZSU anti-aircraft platforms and BTR-40 and -50 swept the Communists to victory.??This fine book brings details and images of all these diverse weaponry to the reader in one volume.
