Prioritization, Delegation, and Assignment: Practice Exercises for the NCLEX® Examination is the only review book on the market with a focus on prioritization and management of care—just like the current NCLEX Examination itself! The workbook's unique approach establishes your foundational knowledge and then provides exercises of increasing difficulty to help you build confidence in your prioritization, delegation, and patient assignment skills. It offers unique preparation for the NCLEX Examination and effectively equips you to practice in today's fast-paced healthcare environment. The only workbook available that provides in-depth practice with prioritization, delegation, and assignment questions similar to those you'll see on the NCLEX Examination, including questions in alternate item formats Unique three-part organization that (1) equips you with foundational skills to make sound decisions, then helps you apply those skills (2) in straightforward scenarios and (3) then in complex health scenarios In-depth Answer Key at the back of the book that provides not only the correct answer but also a detailed rationale and an indication of the focus of the question, whether prioritization, delegation, supervision, or patient assignment. Expanded content focus to include psychiatric/mental health, OB/maternity, and pediatrics along with med-surg areas New chapters on infection control and obstetrics and maternity Greater emphasis on questions involving core body systems and related health problems, such as diabetes and cancer, to best prepare you for the conditions you are most likely to encounter on the NCLEX Examination and in clinical practice Four new unfolding cases addressing long-term care, pediatrics, psychiatric/mental health nursing, and OB/maternity Additional emphasis on medication safety equips you to take appropriate actions to prevent or remediate medication errors Multiple-select questions revised to include at least 5 response choices each, keeping you up to date with the full range of NCLEX Examination item formats

Preparing for the Neurology Boards, recertification, or the AAN's RITE® Residency In-Service Training Exam can be daunting, years of study, training, and volumes of material to be processed, organized, and distilled for ready recall when the moment arrives. It may seem impossible to retain so much information. However, the completely revised and expanded Second Edition of this unique, easy-to-use bestselling review guide gives you all the tools you need to tie it all together no additional texts needed. And with Ultimate Review for the Neurology Boards you have free web support including:

For all students and clinicians assessing or caring for patients with cardiopulmonary disorders, Respiratory Care: Patient Assessment and Care Plan Development is a must-have resource. As the most comprehensive reference available, it is a guide to the evaluation of the patient, and the development and implementation of an appropriate, evidence-based, respiratory care plan. Respiratory Care: Patient Assessment and Care Plan Development describes the purpose of patient assessment and then guides the reader through the process of the reviewing existing data in the medical record, conducting the patient interview, performing the physical assessment, and finally evaluating the diagnostic studies needed and implementing a respiratory care plan. Bridging the gap between patient assessment and treatment, the reader will learn how to apply assessment skills to the development and implementation of respiratory care plans. Integrated throughout each chapter are Clinical Focus exercises, RC Insights!, and Key Points to help readers refine critical thinking and problem solving skills as well as strongly grasp important concepts. Chapter 1 Introduction to Patient Assessment Chapter 2 Development and Implementation of Respiratory Care Plans Chapter 3 Review of the Medical Record Chapter 4 Patient History Chapter 5 Physical Assessment Chapter 6 Assessment of Oxygenation Chapter 7 Assessment of Ventilation Chapter 8 Blood Gas Analysis, Hemoximetry, and Acid-Base Balance Chapter 9 Laboratory Studies Chapter 10 Cardiac Assessment and the Electrocardiogram Chapter 11 Cardiopulmonary Imaging Chapter 12 Adult Pulmonary Function Chapter 13 Bronchoscopy and Special Procedures Chapter 14 Acute and Critical Care Monitoring and Assessment Chapter 15 Obstructive Sleep Apnea Chapter 16 Neonatal and Pediatric Assessment.

Now in two colours throughout, this new edition of LectureNotes: Neurology contains the core neurological information required, whichever branch of clinical medicine you choose. Reflecting current clinical practice, the latest advances in the diagnosis and management of neurological diseases are concisely covered. The book is divided into two parts. The Neurological Approach looks at neurological history taking. The neurological examination is then discussed in detail - consciousness, cognitive function, vision and other cranial nerves, motor function, sensation and autonomic function. In part two, Neurological Disorders, the common neurological conditions are described, along with neurological emergencies and neuro-rehabilitation. Featuring a
