Introducing contract law, volume one of this text treats remedies for breach of contract, contract and continuing relations, and social control of free contract. Chapters in volume two cover formation of contract; incomplete planning; flexibility and enforceability; closing a deal; and more.

This fifth edition reference on contract law by Murray (law, Duquesne U.) has been updated to reflect the changes in the ever evolving field. The author provides comprehensive treatments on a variety of related elements, including: the agreement and validation processes, the frauds statute, abuse of bargain and illegality, risk allocation, remedies for breach of contract, contract beneficiaries, assignment of rights and delegation of duties, and more. The book will interest students in related fields as well as contract law practitioners. Annotation ©2012 Book News, Inc., Portland, OR (booknews.com).

To provide valuable legal service to persons in today's Europe, practitioners must be conversant in both national and transnational law. At the European level, the Principles of European Contract Law (PECL) are an increasingly important element of contract law, together with national contract law, as contained in Civil Codes and various national statute. Accordingly, Kluwer Law International has initiated a series of volumes, under the direction of prof. Hondius of the University of Utrecht, comparing PECL with the most important European legal systems. This volume on Italian law is the second in the series. Using a straightforward comparative method, the editors; analysis not only reveals a significant area of convergence between the PECL and Italian contract law, but also highlights the main differences between the two bodies of rules. The reasons for these differences, both legal and non-legal (such as historical, social, economic), are clearly set forth. The book provides complete texts, with annotations, of the PECL and the corresponding Italian rules. The presentation proceeds as follows: general provisions (scope of application, general duties, terminology)formation of contracts (general provisions, offer and acceptance, liability for negotiations)authority of agents (general provisions, direct and indirect representation)validityinterpretationcontents and effectsperformanceon-performance and remedies in generalparticular remedies for non-performance (right to performance, withholding performance, termination of the contract, price reduction, damages and interest) The editors commentary includes extensive reference to case law and legal doctrine at all essential points. In this way they provide a comprehensive description of the law in action as well as its evolving trends. In addition, incisive essays by two leading experts in the field of comparative law, prof. Rodolfo Sacco and prof. Michael Joachim Bonell, analyse the relationship of the PECL and Italian law and its wider framework in the harmonisation of private law at the European and international levels. The book is a valuable handbook and guide for both foreign and Italian lawyers. For non-Italian lawyers, be they practitioners or academics, it provides a concise but complete and up-to-date outline of current Italian contract law, organized on the basis of a system (PECL) with which many European lawyers are familiar. For Italian lawyers, it offers a clearer insight into a wider European legal contract system whose importance in the evolution of a common European private law is growing rapidly. Principles of European Contract Law Series 2

The Common Law is one of the two major and successful systems of law developed in Western Europe, and in one form or another is now in force not only in the country of its origin but also in the United States and large parts of the British Commonwealth and former parts of the Empire. Perhapsits most typical product is English Contract Law, developed continuously since the birth of the common law almost wholly by judicial decision. Although in its modern form primarily a product of the nineteenth century, the common law of contract as we know it developed around the action of assumpsitwhich evolved at the close of the fourteenth century, and many of its characteristic doctrines first emerged in the sixteenth and seventeenth centuries. This book, which takes the story up to 1677 (the date of Statute of Frauds) forms the first part of the history of contract law, and is writtenprimarily from a doctrinal standpoint.

Contract law as applied in the real world and not just in the law books: the classic study of the social and economic realities of contracts in commercial and trade cases, told through case studies and rich historical analysis. A recognized and oft-cited study in law & society, this volume previously hid out as a rare book or was completely unavailable. Now readily accessible and reasonably priced, it also features a new preface by the author and a new, analytical foreword by Stewart Macaulay.

The International Encyclopedia of Comparative Law, published in 17 volumes, is written by worldwide recognized leading specialists of comparative law. 16 of these volumes are devoted to one large area of private and commercial law, each of which is dealt with exclusively from a comparative law perspective, whereas the first volume provides reports on all the countries of the world, in alphabetical order, pertaining to the same subjects. Volume VII (in two part volumes) of the International Encyclopedia of Comparative Law is devoted to the general issues of contract law. The first seven chapters deal, respectively, with the basic functions and philosophy of contract; its history; as well as its use by big enterprises; with the public contract; and its role and treatment in the former socialist countries, in the Far East and in Islamic law. Broadest space is allotted to the various heads of general contract law: conclusion, form, defects of consent, general terms of business, rights of third parties and, finally the important issues of non-performance. Contents: Arthur von Mehren: A General View of Contract - James Gordley: Contract in Pre-Commercial Societies and in Western History - Lawrence M.Friedman, Stewart Macaulay and Manfred Rehbinder: The Impact of Large Scale Business Enterprise Upon Contract - Colin C.Turpin: Public Contracts - Gyula Eorsi, Olympiad S.
