Every Family Has Issues There is no such thing as a perfect family...or an easy family. We all make mistakes that hurt our family members and we've all been hurt by those we love. 6 Hidden Behaviors That Destroy Families by Dr. Magdalena Battles addresses the top conflicts that cause relationships to become strained or broken. These hidden behaviors are: □ A failure to forgive or apologize □ Criticism □ Gossip □ Deception □ A lack of inclusion □ A failure to accept differences While every family has issues, what really matters is how we deal with them. Are we working in a way that resolves problems? Or are we allowing them to fester and explode? The healing in your family can begin with you. It often takes just one person to make the changes needed to make relationships more positive. Dr. Battles provides you with practical tips based on research, biblical principles, and her own observations of what has worked in families—including her own. Here are essential tools to restore the damaged relationships in your life. Families can function in a way where love and support are practiced daily. It is a process, but the result will be happier lives and more fulfilling relationships.

An Invitation to Community and Models for Connection After almost every presentation activist and writer Mia Birdsong gives to executives, think

tanks, and policy makers, one of those leaders quietly confesses how much they long for the profound community she describes. They have family, friends, and colleagues, yet they still feel like they're standing alone. They're "winning" at the American Dream, but they're lonely, disconnected, and unsatisfied. It seems counterintuitive that living the "good life"--the well-paying job, the nuclear family, the upward mobility--can make us feel isolated and unhappy. But in a divided America, where only a quarter of us know our neighbors and everyone is either a winner or a loser, we've forgotten the key element that helped us make progress in the first place: community. In this provocative, groundbreaking work, Mia Birdsong shows that what separates us isn't only the ever-present injustices built around race, class, gender, values, and beliefs, but also our denial of our interdependence and need for belonging. In response to the fear and discomfort we feel, we've built walls, and instead of leaning on each other, we find ourselves leaning on concrete. Through research, interviews, and stories of lived experience, *How We Show Up* returns us to our inherent connectedness where we find strength, safety, and support in vulnerability and generosity, in asking for help, and in being accountable. Showing up--literally and figuratively--points us toward the promise of our collective vitality and leads us to the liberated well-being we all want.

An innovative, student-friendly textbook covering the major elements of the field of Family Communication Family Communication, a rapidly growing sub-discipline within Communication Studies, explores the processes and factors involved in family interactions and relationships. Communication in Family Contexts is a clear and accessible survey of the essential principles, theories, and concepts of the field. Unlike textbooks that present a vast amount of material across only a few chapters—this innovative textbook features brief, easily-understood chapters ideally-suited for undergraduate courses on the subject. The text provides concise yet comprehensive coverage of a diverse range of topics, from fundamental aspects of caretaking and sibling communication, to topics not covered in other textbooks such as estrangement and marginalization. 33 chapters cover theories of family communication, family communication processes, and communicating in family relationships. The authors, noted researchers and educators in the field, complement discussions of standard topics with those of growing contemporary interest, such as LGBTQ family communication, step-family and half-sibling relationships, and the influence of technology on family. This textbook: Provides a well-rounded

examination of the major elements of Family Communication studies Explains the foundational theories of the field, including Family Communication Patterns Theory and Relational Dialectics Theory Features numerous practical application exercises to enable students apply theory to practice Includes a complete set pedagogical features, such as case studies, visualizations and models of theories, illustrations, and discussion questions Offers a flexible organizational structure that allows instructors to pick and choose chapters to meet the needs of their courses Communication in Family Contexts: Theories and Processes is an important resource for instructors and students in the field of family communication, the wider discipline of Communication Studies, and related areas such as social psychology and sociology.

This book argues that guilt, shame, and remorse, associated with a history of substance abuse, explain why a minority of Islamist extremists carried out suicide terrorism in Europe between 2001 and 2018. Since 9/11, Islamist terrorism has dominated the European security landscape, but there has been little systematic analysis of either the attacks or the men responsible. This book addresses that gap, drawing on terrorist discourse, court transcripts, elite interviews, government reports, and three years of ethnography to provide an exhaustive account of how and why Islamist terrorism has occurred in Europe. Making a detailed analysis of 48 terrorist attacks carried out by 80 suicide terrorists, the book introduces two new theories. The first argues that most of these men first engaged in Islamist extremism as an alternative to substance abuse. The second contends that, following

a five-stage process of radicalisation, cognitive dissonance triggered guilt, shame, and remorse over previous misconduct. From this emotional distress, suicide terrorism emerged as a rational choice ahead of either suicide or a return to active addiction. This book argues that the root cause of suicide terrorism in Europe is not so much politics or religion but is more about personal crisis and a search for redemption. This book will be of great interest to students of terrorism/counterterrorism, de-radicalisation, political Islam, and security studies in general.

From about 1830 to 1849, Bent's Old Fort, located in present-day Colorado, was the largest trading post in the Southwest and the mountain-plains region. Although the raw enterprise and improvisation that characterized the American westward movement seem to have little to do with ritual, Douglas Comer argues that the fort grew and prospered because of ritual and that ritual shaped the subsequent history of the region to an astonishing extent.

Since the FDA approved Viagra in March 1998, the «little blue pill» has been prescribed to over twenty million men. The *Viagra Ad Venture: Masculinity, Media, and the Performance of Sexual Health* chronicles the story of Viagra as reported in our nation's news outlets and promoted by Pfizer Pharmaceutical's marketing materials. In this critical discourse analysis, author Jay Baglia uses feminist and performance theory to uncover the meaning of Viagra and its relationship to performances of masculinity. At stake are the ways in which we construct normalcy, particularly as it relates to health,

sexuality, gender, and the body. This book fits well in a variety of classes including gender studies, media studies, research methods, feminist theory, human sexuality, and health communication.

This book explores the contradictions of biography. It charts shifting approaches to the writing and reading of biographies, from post-hagiographical attitudes of the Enlightenment, heroic biographies of Romanticism and irreverent modernist portraits through to contemporary experiments in politically committed and hybrid forms of life writing. The book shows how biographical texts in fact destabilise the models of historical visibility, cultural prominence and narrative coherence that the genre itself seems to uphold. Addressing the fraught relationships between genre and gender, private and public, image and text, life and narrative that play out in the modern biographical tradition, Metabiography suggests new possibilities for reading, writing and thinking about this enduringly popular genre.

Thinking Critically About the Kennedy Assassination uses the tools of critical thinking, historical research, and philosophical inquiry to debunk the many myths and conspiracy theories surrounding JFK's shocking and untimely death. As we approach the 60th anniversary of the violent public assassination of President John F. Kennedy, over half of all Americans surveyed continue to believe that he was killed by a conspiracy involving multiple assassins. Through its reasoned and detailed analysis of the content and evolution of JFK conspiracy narratives, this book also serves as a comprehensive case study of paranoid

reasoning and modern mythmaking. The book's opening chapters lay out the "official" academic consensus concerning the Kennedy assassination (better known as the "Lone Gunman Theory") and discuss the origins of popular interpretations of Kennedy's life and death, such as the nostalgic myth of "Camelot," the unsympathetic "Irish Mafia" narrative, and the many conspiracy theories critical of both. Subsequent sections scrutinize the alleged motives of leading conspiracy suspects, the ballistic, forensic, and medical evidence related to JFK's murder, and the most popular "proofs" of an enduring government cover-up. The book concludes that no clear evidence exists to suggest that JFK was the victim of a conspiracy and ends with a discussion of the causes and consequences of paranoid thinking in contemporary public discourse. This volume will appeal to students of history, politics, psychology, and cultural and media studies, and to a broader audience interested in American history, critical thinking, and conspiracy thinking.
