In the third edition of her acclaimed book, Dorinda Outram addresses these and other questions about the Enlightenment as controversy increases about its place at the foundation of modernity. She studies it as a global phenomenon, setting the period against broader social changes.

*The Enlightenment (New Approaches to European History ...*

In this important new textbook Dorinda Outram addresses these, and other, questions about the 'Enlightenment'. She sets the major debates of the period against the broader social changes such as the onset of industrialisation in Western Europe, the establishment of new colonial empires, and the exploration of hitherto unmapped portions of the world's surface.

More importantly, Dorinda Outram's narrative is a needed antidote to the overbearing imbalance that has existed thus far in the English-speaking literature on the Enlightenment. Far too many books make it seem as if the Enlightenment was strictly a French or English affair, which, as Jonathan Israel has recently shown in his magisterial *Radical Enlightenment*, is a complete distortion.

Debate over the meaning of 'Enlightenment' began in the eighteenth century and has continued unabated until our own times. This period saw the emergence of arguments on the nature of man, truth, the place of God, and the international circulation of ideas, people and gold. In the second edition of her book, Dorinda Outram studies the Enlightenment as a global phenomenon, comparing it against the period's broader social changes. The new edition also features a new introduction and chapter on slavery, and the bibliography and short biographies have been extended.

An engaging and accessible overview of the Enlightenment as a global phenomenon, with updated material and additional online resources.

Presents a comprehensive overview of the Enlightenment, discussing the intellectuals of the period who promoted the scientific method of investigation and explored such topics as nature, the universe, the human mind, the rights of women, and medicine.

Unveiling the nearly lost world of the court fools of eighteenth-century Germany, Dorinda Outram shows that laughter was an essential instrument of power. Whether jovial or cruel, mirth altered social and political relations. Outram takes us first to the court of Frederick William I of Prussia, who emerges not only as an administrative reformer and notorious militarist but also as a "master of fools," a ruler who used fools to prop up his uncertain power. The autobiography of the itinerant fool Peter Prosch affords a rare insider's view of the small courts in Catholic south Germany, Austria, and Bavaria. Full of sharp observations of prelates and princes, the autobiography also records episodes of the extraordinary cruelty for which the German princely courts were notorious. Joseph Fröhlich, court fool in Dresden, presents more appealing facets of foolery. A sharp salesman and hero of the Meissen factories, he was deeply attached to the folk life of fooling. The book ends by tying the growth of Enlightenment skepticism to the demise of court foolery around 1800. Outram's book is invaluable for giving us such a vivid depiction of the court fool and especially for revealing how this figure can shed new light on the wielding of power in Enlightenment Europe.

Debate over the meaning of 'Enlightenment' began in the eighteenth century and still continues to this day. This period saw the opening of

arguments on the nature of man, truth, the place of God and the international circulation of ideas, people and gold. But did the Enlightenment mean the same for men and women, for rich and poor, for Europeans and non-Europeans? In the third edition of her acclaimed book, Dorinda Outram addresses these and other questions about the Enlightenment as controversy increases about its place at the foundation of modernity. She studies it as a global phenomenon, setting the period against broader social changes. This new edition offers a new chapter on political economy, a completely revised further reading section and a new feature on electronic sources to stimulate primary research. This accessible overview will be essential reading for students of eighteenth-century history, philosophy and the history of ideas.

Science, Enlightenment and Revolution brings together thirteen papers by renowned historian Dorinda Outram. Published between 1976 and 2019 and scattered in a variety of journals and collected volumes, these articles are published together here for the first time. During her distinguished career, Outram has made significant contributions to the history of science, to the history and historiography of the Enlightenment, to gender history, to the history of geographical exploration, and to the historical uses of language. This volume also includes other writings by Outram, comprising an unpublished introduction in the form of an intellectual autobiography. Placing this together with her collected academic papers offers readers an overview of her development as an historian and a writer. This book is important reading for scholars and students of early modern Europe, as well as those interested in the Enlightenment, the French Revolution and gender studies.

Exploring both the Enlightenment as a geographical phenomenon and the place of geography in the Enlightenment, 14 papers from a July 1996 conference in Edinburgh survey the many ways in which the world of the long 18th century was shaped through map, text, exploration, and argument and within and across spatial and intellectual borders. An illuminating study of the marriages and family lives of Diderot, Lavoisier, and other geniuses of the Age of Reason. We may imagine the lone scientific or philosophical genius generating insights in isolation—but in reality, the families of scientists and philosophers during the Enlightenment played a substantial role, not only making space for inquiry within the home but also assisting in observing, translating, calculating, and illustrating. *Sentimental Savants* is the first book to explore the place of the family among the savants of the French Enlightenment, a group that openly embraced their families and domestic lives, even going so far as to test out their ideas, from education to inoculation, on their own children. Meghan K. Roberts delves into the lives and work of such major figures as Denis Diderot, Emilie Du Chatelet, the Marquis de Condorcet, Antoine Lavoisier, and Jerome Lalande to paint a striking portrait of how sentiment and reason interacted in the eighteenth century to produce not only new kinds of knowledge but new kinds of families as well. “[A] well-crafted study...an important contribution to what Robert Darnton has called ‘the social history of ideas.’”—Choice

This novel study of political culture in Enlightenment Europe analyses print, public opinion and the transnational dissemination of texts.
