The Ecology of Wisdom is a definitive collection of essays by Norwegian philosopher Arne Naess,

Page 34/63

a founder of the Deep Ecology movement and one of the leading thinkers of modern environmentalism.

Drengson and Devall provide a comprehensive and accessible portrait of Naess's philosophy and activism, and showcase his enthusiasm, wit, and spiritual fascination with nature.

The basic thesis of the work is that environmental problems are only to be solved by people - people who will be required to make value judgements in conflicts that go beyond narrowly conceived human concerns. Thus people require not only an ethical system, but a way of conceiving the world and themselves

such that the intrinsic value of life and nature is obvious, a system based on 'deep ecological principles'. The book encourages readers to identify their own series of such parameters - their own ecosophies.

Ecology, Community and Lifestyle will appeal to philosophers, specialists working on environmental issues,

and the more general reader who is interested in learning some of the foundational ideas of the rapidly expanding field of environmental philosophy.

Proposes an original approach to religious diversity, from religious pluralism and inter-faith dialogue to new existential challenges.

This book tells the story of visionary urban experiments, shedding light on the theories that preceded their development and on the monsters that followed and might be the end of our cities. The narrative is threefold and delves first into the eco-city, second the smart city and third the autonomous city

Download Free Ecology Of

intended as a place where existing smart technologies are evolving into artificial intelligences that are taking the management of the city out of the hands of humans. The book empirically explores Masdar City in Abu Dhabi and Hong Kong to provide a critical analysis of eco and smart city experiments and

Download Free Ecology Of

their sustainability, and it draws on numerous real-life examples to illustrate the rise of urban artificial intelligences across different geographical spaces and scales.

Theoretically, the book traverses philosophy, urban studies and planning theory to explain the passage from eco and smart cities to the autonomous city, and

Download Free Ecology Of

to reflect on the meaning and purpose of cities in a time when human and non-biological intelligences are irreversibly colliding in the built environment. Iconoclastic and prophetic, Frankenstein Urbanism is both an examination of the evolution of urban experimentation through the lens of Mary

Now available in English for the first time, Norwegian philosopher Arne Naess's meditation on the art of living is an exhortation to preserve the environment and biodiversity. As Naess

Download Free Ecology Of

approaches his ninetieth year, he offers a bright and bold perspective on the power of feelings to move us away from ecological and cultural degradation toward sound, future-focused policy and action. Naess acknowledges the powerlessness of the intellect without the heart, and, like Thoreau before him, he rejects the

Download Free Ecology Of

Cartesian notion of mind-body separation. He advocates instead for the integration of reason and emotion--a combination Naess believes will inspire us to make changes for the better. Playful and serious, this is a guidebook for finding our way on a planet wrecked by the harmful effects of consumption, population growth,

commodification,
technology, and
globalization. It is sure to
mobilize today's
philosophers,
environmentalists, policy
makers, and the general
public into seeking--with
whole hearts rather than
with superficial
motives--more effective
and timelier solutions.
Naess's style is reflective
and anecdotal as he

shares stories and details from his rich and long life. With characteristic goodwill, wit, and wisdom, he denounces our unsustainable actions while simultaneously demonstrating the unsurpassed wonder, beauty, and possibility our world offers, and ultimately shows us that there is always reason for hope, that everyone is a
