Throughout the Middle Ages, fictional frameworks could be used as imaginative spaces in which to test or play with ideas without asserting their truth. The aim of this volume is to consider how intellectual problems were approached--if not necessarily resolved--through the kinds of hypothetical enquiry found in poetry and in other texts that employ fictional or imaginative strategies. Scholars working across the spectrum of medieval languages and academic disciplines consider why a writer might choose a fictional or hypothetical frame to discuss theoretical questions, how a work's truth content is affected and shaped by its fictive nature, or what kinds of affective or intellectual work its reading demands. By reading literary, philosophical, and spiritual texts from England, France, and Italy alongside each other, this collection offers a new interdisciplinary approach to the history of medieval thought.

This collection of literature attempts to compile many of the classic works that have stood the test of time and offer them at a reduced, affordable price, in an attractive volume so that everyone can enjoy them.

This important and overdue book examines illuminated manuscripts and other book arts of the Global Middle Ages. Illuminated manuscripts and illustrated or decorated books—like today's museums—preserve a rich array of information about how premodern peoples conceived of and perceived the world, its many cultures, and everyone's place in it. Often a Eurocentric field of study, manuscripts are prisms through which we can glimpse the interconnected global history of humanity. *Toward a Global Middle Ages* is the first publication to examine decorated books produced across the globe during the period traditionally known as medieval. Through essays and case studies, the volume's multidisciplinary contributors expand the historiography, chronology, and geography of manuscript studies to embrace a diversity of objects, individuals, narratives, and materials from Africa, Asia, Australasia, and the Americas—an approach that both engages with and contributes to the emerging field of scholarly inquiry known as the Global Middle Ages. Featuring 160 color illustrations, this wide-ranging and provocative collection is intended for all who are interested in engaging in a dialogue about how books and other textual objects contributed to world-making strategies from about 400 to 1600.

The Middle Ages (c.500-1500) includes a thousand years of European history. In this *Very Short Introduction* Miri Rubin tells the story of the times through the people and their lifestyles. Including stories of kingship and Christian salvation, agriculture and trade, Rubin demonstrates the remarkable nature and legacy of the Middle Ages.

This volume is a collection based on the contributions to witchcraft studies of Willem de Blécourt, to whom it is dedicated, and who provides the opening chapter, setting out a methodological and conceptual agenda for the study of cultures of witchcraft (broadly defined) in Europe since the Middle Ages. It includes contributions from historians, anthropologists, literary scholars and folklorists who have collaborated closely with De Blécourt. Essays pick up some or all of the themes and approaches he pioneered, and apply them to cases which range in time and space across all the main regions of Europe since the thirteenth century until the present day. While some draw heavily on texts, others on archival sources, and others on field research, they all share a commitment to reconstructing the meaning and lived experience of witchcraft (and its related phenomena) to Europeans at all levels, respecting the many varieties and ambiguities in such meanings and experiences and resisting attempts to reduce them to master narratives or simple causal models. The chapter 'News from the Invisible World: The Publishing History of Tales of the Supernatural c.1660-1832' is available open access under a CC BY 4.0 license at link.springer.com.

Recent advances in research show that the distinctive features of high medieval civilization began developing centuries earlier than previously thought. The era once dismissed as a "Dark Age" now turns out to have been the long morning of the medieval millennium: the centuries from AD 500 to 1000 witnessed the dawn of developments that were to shape Europe for centuries to come. In 2004, historians, art historians, archaeologists, and literary specialists from Europe and North America convened at Harvard University for an interdisciplinary conference exploring new directions in the study of that long morning of medieval Europe, the early Middle Ages. Invited to think about what seemed to each the most exciting new ways of investigating the early development of western European civilization, this impressive group of international scholars produced a wide-ranging discussion of innovative types of research that define tomorrow's field today. The contributors, many of whom rarely publish in English, test approaches extending from using ancient DNA to deducing cultural patterns signified by thousands of medieval manuscripts of saints' lives. They examine the archaeology of slave

labor, economic systems, disease history, transformations of piety, the experience of power and property, exquisite literary sophistication, and the construction of the meaning of palace spaces or images of the divinity. The book illustrates in an approachable style the vitality of research into the early Middle Ages, and the signal contributions of that era to the future development of western civilization. The chapters cluster around new approaches to five key themes: the early medieval economy; early medieval holiness; representation and reality in early medieval literary art; practices of power in an early medieval empire; and the intellectuality of early medieval art and architecture. Michael McCormick's brief introductions open each part of the volume; synthetic essays by accomplished specialists conclude them. The editors summarize the whole in a synoptic introduction. All Latin terms and citations and other foreign-language quotations are translated, making this work accessible even to undergraduates. *The Long Morning of Medieval Europe: New Directions in Early Medieval Studies* presents innovative research across the wide spectrum of study of the early Middle Ages. It exemplifies the promising questions and methodologies at play in the field today, and the directions that beckon tomorrow.
