Together these countries pioneered new technologies that have made them ever richer.

'Globalization' has become a popular buzzword for explaining today's world. The expression achieved terminological stardom in the 1990s and was soon embraced by the general public and integrated into numerous languages. This text makes the case that globalization is not so new after all.

In its heyday in the late 1990s, neoliberalism emerged as the world's dominant economic paradigm. But the global financial crisis of 2008-9 fundamentally shocked a globalized economy built on neoliberal assumptions. This VSI examines the origins, core claims, and considerable variations of neoliberalism with examples from around the world.

Paul Hopper leads the reader through the varied issues associated with globalization and culture, including deterritorialization, cosmopolitanism, cultural hybridization and homogenization as well as claims that aspects of globalization are provoking cultural resistance.

This title outlines the history and development of capitalism and addresses important 21st-century issues, such as New Labour's relationship with capitalism, recent crises in capitalist systems, the significance of global capitalism, and distinctive national models of capitalism. The word is heard and used frequently. Most people have an opinion about it. Has capital escaped the nation-state by going global? Is it doomed? There are alternatives to capitalism, in the guises of socialism, communal and cooperative experiments, and alternatives proposed by environmentalists.
