Bestselling author and marketing guru Joe Vitale offers insights and life lessons for achieving success. In the simple, straightforward tone of an instructional manual, this little book offers big wisdom and little-known secrets for living a better life. Packed with life lessons most people will wish they'd learned earlier, *Life's Missing Instruction Manual* uses humor and anecdote to present practical steps readers can use to take control of their lives, overcome any obstacle, and find fulfillment. Each simple lesson is explained and brought into focus with real-life examples and includes practical steps on putting those lessons to work every day. Full of uncommon wisdom and lighthearted humor, this book will help readers develop confidence, create a plan for success, get ahead at work, build rapport with others, develop time-management skills, and find wealth and happiness. Readers will learn how to live life to the fullest when they discover how to:

- \* Take chances that lead to success
- \* Get through the tough times
- \* Be themselves and like it
- \* Find their purpose
- \* Work as a team
- \* Create their own blueprint for success
- \* Believe in themselves
- \* Lead a good and moral life
- \* Accept their mistakes and move on
- \* Define success for themselves

Joe Vitale (Wimberley, TX) is President of Hypnotic Marketing, Inc., and author of *The Attractor Factor* (0-471-70604-3) and *The E-Code* (0-471-71855-6). He has been called "the Buddha of the Internet" for his combination of spirituality and marketing acumen. His professional clients include the Red Cross, PBS, Hermann Children's Hospital, and many other small and large international businesses.

This self-instructional manual on the interpretation and use of epidemiologic data deals with the basic concepts and skills needed for the appraisal of published reports or one's own findings. Applications in clinical medicine, public health, community medicine, and research are all taken into consideration. *Making Sense of Data* is designed as a workbook of short exercises and instructional self-tests that introduce fundamental approaches and procedures in data interpretation and develop competency in working with epidemiologic tools. Basic concepts are presented in the first section, which also demonstrates the step-by-step assessment of data. The next section discusses rates and other simple measures, and the third shows how to judge their accuracy. Section IV and V deal with more complex issues of associations between variables and the appraisal of cause-effect relationships. Section VI deals with meta-analysis (the critical review and integration of the findings from separate studies) and section VII with the questions to be asked before deciding to apply study results in practice. Numerous changes have been made in this edition, including the addition of a section on the practical application of epidemiological findings, discussions of new topics (Cox proportional hazards regression, qualitative studies, ROC curves), and fresh examples.

Twenty-five years ago, how many people were thinking about the internet on a daily basis? Now you can find everything, including technical and instruction manuals, online. But some things never change. Users still need instructions and warnings to guide them in the safe and proper use of products. Good design, clear instructions and warnings, placement of graphics, all the traditional elements hold true whether designing for print or online materials. And technical writers still need those two most valuable commodities—time and information—to do their jobs well. Another constant, *Writing and Designing Manuals and Warnings*, now in its fourth edition, offers real-world guidance based on real-world know-how for the development of product documentation. See *What's New in the Fourth Edition: New organization to clarify the principles of manual and warning development Coverage of the digital revolution and the global marketplace Expanded section on product safety and warnings Information on international standards for warnings Backed by Research and Collective Experience Drawn from the collective experience of hundreds of technical writers, graphic artists, and product safety engineers, along with the author's nearly 30 years of experience helping companies improve instructions and warnings, this how-to book covers every aspect of developing state-of-the-art product manuals and safety warnings. Filled with examples that show how good manuals and effective warnings can add value to your company's products and build repeat business, while at the same time reducing liability exposure, the text demonstrates how to create manuals that give products a competitive edge and improve customer satisfaction. Solidly grounded in research, but not a stuffy academic treatise, this down-to-earth, practical book is a survival guide for writers in the real world of short deadlines and tight budgets.*

Annually updated and revised by Hon. Donald G. Alexander of the Maine Supreme Judicial Court, *Maine Jury Instruction Manual* includes a wide array of civil and criminal jury instructions accompanied by commentary and discussion of practice points for closing arguments. New and revised instructions and commentary offer expert guidance on convening the jury panel, jury selection and voir dire, and return of the verdict, as well as practical guidance on how to present information to a jury in layman's terms to ensure effective communication with jury panels. *Maine Jury Instruction Manual* also provides extensive cross-references and online hyperlinks to the pattern criminal jury instructions for the District Courts of the First Circuit, with a cross-reference table and cross-references in related individual jury instructions. The subject matter index, table of cases, and table of statutes are also annually updated to reflect expanded and revised jury instruction coverage. The sample jury instructions will help legal
