Each section starts with the specifics of the components used in that circuit and then there's a deep analysis of how current flows on the circuit. The idea is to first explain and give the reader the particulars of each circuit, then go deeper and analyze why the circuit behaves the way it does, how to diagnose it and how to connect it in case the whole wiring is missing, obsolete or simply was never present to begin with. Graphic artist Trinity Hargrove never knew real passion until she sleeps with her boss's son. Mistake number one. Mistake number two...liking it too much. But they agreed to only one night. Simple enough, right? Wrong. He may be out of her bed, but their intense night together still burns in her memories. As long as she keeps her distance from the oh-so-desirable Xander Duval, everything will be okay. Unfortunately, fate won't go along with her plan. Restaurateur Xander Duval agrees to Trinity's "one night" stipulation, but only in theory. He has no intentions of not being with her again. Especially when his mind-nor body-will allow him to forget the fire that blazed between them until the wee hours of the morning. When Trinity is injured in an automobile accident, he jumps at the opportunity to be her arms and legs. He plans to show her just how determined he is to make her his...for far longer than just one night.

raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

" ... contains a selection of texts and essays by the writer, Brian Holmes, that engage with the possibilities and problematics of geopolitics and geopoetics. Holmes is a crucial contemporary writer and thinker whose insight into current social and political developments and how they relate to artistic processes opens up a new field of 'geocritique.' The examples he cites extend across Latin America, Europe and Asia, where he looks at networks, artworks, films, institutions and protest movements for signs of how future strategies might be shaped. The texts are connected with the long-term collaborative research project, Continental Drift."--P. [6].

Tools for amateur astronomers who wish to go beyond CCD imaging and step into "serious" science. This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

Although contemporary art may sometimes shock us, more alarming are recent attempts to

regulate its display. Drawing upon extensive interviews, a broad sampling of media accounts, legal documents and his own observations of important events, sociologist Steven Dubin surveys the recent trend in censorship of the visual arts, photography and film, as well as artistic upstarts such as video and performance art. He examines the dual meaning of arresting images--both the nature of art work which disarms its viewers and the social reaction to it. Arresting Images examines the battles which erupt when artists address such controversial issues as racial polarization, AIDS, gay-bashing and sexual inequality in their work.
