Following Lord Bew's review of Key Stage 2 tests, the government announced that pupils will, from 2012, no longer be given externally examined writing tests. These will be replaced with teacher assessment of writing. Further to this, a new test which assesses spelling, grammar, punctuation and vocabulary will be trialed in 2012.

The grading system for Key stage 2 SATs is based on scaled scores. As all Key stage 2 SATs are marked externally, these raw scores are converted to scaled scores. A scaled score of 100 shows a pupil has achieved the expected standard of the paper. A pupil with a scaled score of 99 would not have met the expected standard of the test.

It gives extensive coverage to children's rights in the context of education and includes considerable new material on issues including relationships and sex education, exclusion from school, home education, equal access, counter-extremism and academisation. The new edition also retains and updates areas of debate in the book, such as those concerned with multiculturalism and the position of religion in schools. It continues to focus on England but also makes reference to other jurisdictions within the UK and internationally. It is essential reading for anyone interested in the legal and related policy issues surrounding children's education today.

This volume develops a theoretical and critical foundation for understanding "maladministration"—the phenomena of harmful administrative and organisational behaviours in educational systems. Chapter authors provide theoretical and practice-based perspectives across international contexts regarding common destructive practices that occur in educational organisations, such as negligence and mistreatment of people, professional dishonesty, fraud and embezzlement, abuse of power, and corrupt organisational cultures. *International Perspectives on Maladministration in Education* shines a light on this complex topic by examining various practices at individual, group, organisational, and system levels; the contexts and influences that give rise to them; and potential remedies to ensure more accountable, just, and safe institutions.

This comprehensive, practical second edition has been updated in line with the new standards for qualified teacher status, in particular the competence in monitoring and assessment. Writing primarily for student and newly qualified teachers, whose classroom experience is necessarily limited, the author takes pains to elucidate why to assess, what to assess and how to assess. Theory and practice are linked throughout by way of case studies, activities and discussion points. Question and answer format, children's work and authentic written records are used to exemplify monitoring and assessment in action as part of the planning cycle. Photocopiable examples of recording sheets and a glossary of terms provide readers with valuable starting points for their own practice.

As part of the discovery of cognitive science, teachers are waking up to the powers of dual coding - combining words with visuals in your teaching. But cognitive scientists aren't graphic designers, and so their books don't show teachers how to be competent in producing effective visuals. There is a huge gap between what we know about dual coding and the skills needed to practice it effectively in the classroom. Until now. *Dual Coding With Teachers* is a breakthrough educational book. No other book has been designed with both cognitive science and graphic principles in mind. Every page contains diagrams, infographics, illustrations and graphic organisers. The book is designed to cater for both the busy teacher in a rush, as well as the research-hungry colleague. Over 35 teachers, teacher developers, psychologists and information designers are profiled, each with a double-page spread, highlighting their dual coding practice. The author, Oliver Caviglioli, is uniquely placed to bridge the gap between education and graphic design. A former special school head teacher, Oliver learned design principles from an early age from his architect and typographer father. Four decades of reading educational research has found its visual expression in this spectacular, image-rich book.

different popular phonics programmes, set against the DfE (2011) criteria for high-quality phonics teaching. This second edition has been updated in line with the new National Curriculum, includes new guidance on the Year 1 phonics screening check and new lessons ideas and practical guidance for teaching phonics.

This powerful text encourages both pre-service and established teachers, as well as teacher educators, to engage with contemporary debates in primary education. Promoting a critical approach, the chapters explore a wide range of key themes including the importance of values in primary education and the imperative for a curriculum which embraces the whole range of available subjects. At the same time, the chapters are underpinned by a belief that children should be at the heart of all the decisions we make and that primary education should inspire a love of learning, for life. The book aims to support practitioners to make informed judgements and feel confident to argue their point of view with deeper theoretical knowledge and understanding, thus increasing teacher agency and confidence in responding to complex educational and social dilemmas such as literacy levels and rising mental health concerns. Chapters encompass both the macro aspects of primary education and more specialised debates on key topics such as reading, mathematics, languages, early years education and the use of technology. With annotated further reading and reflective questions, this key text is essential reading for all those wanting to develop a better understanding of the issues that shape their practice including student teachers at both undergraduate and postgraduate level, practising teachers engaged in continuing professional development and teacher educators.
