'Language attrition' describes the loss of, or changes to, grammatical and other features of a language as a result of declining use by speakers who have changed their linguistic environment and language habits. In such a situation there may, for example, be simplification in the tense system or in certain properties of subordinate clauses; some vocabulary items might fall into disuse and phonetic features may be restructured. These changes can be affected by features of the speaker's environment, but also by his

This collection of articles provides theoretical foundations and perspectives for language attrition research. Its purpose is to enable investigations of L1 attrition to avail themselves more fully and more fundamentally of the theoretical frameworks that have been formulated with respect to SLA and bilingualism. In the thirteen papers collected here, experts in particular disciplines of bilingualism, such as neurolinguistics, formal linguistics, contact linguistics and language and

identity, provide an in-depth perspective on L1 attrition which will make the translation of theory to hypothesis easier for future research.

This volume consists of a collection of papers that focus on structural/grammatical aspects of the process of first language attrition. It presents an overview of current research, methodological issues and important questions regarding first language attrition. In particular, it addresses the two most prominent issues in current L1 attrition research: Can

attrition effects impact on features of core syntax, or are they limited to interface phenomena?, and; What is the role of age at onset (pre-/post-puberty) in this regard? By investigating attrition in a variety of settings, from a case study of a Spanish-speaking adoptee in the US to an empirical investigation of more than 50 long-term attriters of Turkish in the Netherlands, the investigations presented take a new perspective on these issues. This volume provides a state-of-the-art treatment of research on language attrition, the non-pathological loss of a language through lack of exposure. It combines a review of past and present research with in-depth treatments of specific theoretical and methodological issues and reports on individual studies. Special prominence is given to the identification of problematic areas in attrition research, with a view to pointing out possible solutions. The book specifically addresses

itself to those who wish to acquaint themselves with the research area of language attrition, providing them with both a thorough overview of the field and a basis on which to build their own research. The combination of experience and an innovative outlook present in this collection, however, make it a valuable source for those familiar with attrition as well. Especially useful to both beginners and veterans is the extensive annotated bibliography.

The ability to speak two or more languages is a common human experience, whether

for children born into bilingual families, young people enrolled in foreign language classes, or mature and older adults learning and using more than one language to meet life's needs and desires. This Handbook offers a developmentally oriented and socially contextualized survey of research into individual bilingualism, comprising the learning, use and, as the case may be, unlearning of two or more spoken and signed languages and language varieties. A wide range of topics is covered, from ideologies, policy, the law, and economics, to exposure and

Heritage speakers are a fascinating group of bilinguals with a unique profile. Living abroad as immigrants of the second generation, they speak the language of their own speech community (the heritage language) at home, and the societally dominant language in most other domains. What exactly they know about their heritage language continues to fascinate the research community as well as teachers and other practitioners working with this group. The different contributions cover a large variety of studies into heritage languages spoken in

Europe and North America (including Chinese, Norwegian, Russian, Spanish and Turkish). The volume makes a key contribution to the description and explanation of variability in the outcomes of heritage language acquisition, taking into account a wide range of factors which impact on language acquisition. As comparisons are frequently made with monolinguals and foreign language learners, the volume is also highly relevant for researchers working in monolingual language acquisition and foreign language learning and teaching.
