In 1978 Lawn-boy produced the F series engine. It is arguably the best Lawn-boy engine ever. I believe the F series was produced for over 10 years. Consider: \* Yes, you have to go through the "hassle" of mixing the gas with the oil. Dump one 8oz can of LB oil in your can, fill it with 2 gallons of gas, and shake. Wow, that was hard. \* In the Lawn-boy engine, the internals are constantly being lubricated with a supply of CLEAN oil. All the time.

The crank, piston and rings are identical to those from the "F" series. I know this because I've used them in "F" series engine before. I prefer the "F" series muffler over the "V" so if its not too bad use the F muffler instead and save your money. The "F" engine ranged from 4.4.5, and 5 hp. The "V" was rated solely at 5 hp. Good luck. Neal

Peter Hunn. It's common for homeowners to have 2- or 4-cycle small engines in their lawn and garden equipment, utility vehicles, recreational vehicles, generators and other machines. With this easy-to-follow, richly illustrated handbook, homeowners will be able to understand small engines, troubleshooting them and working on them. The book has a brief history of significant and popular small engines and a guide to setting up a home workshop in which to work on them. It also includes case studies on the disassembly, maintenance, repair and/or rebuilding of: a 2-stroke lawnmower engine, a 4-stroke utility motor, a 2-stroke chainsaw engine, and a curbside junker. The writing is lively and entertaining and the color photos clearly show how to work on these useful engines.
