The COVID-19 pandemic has caused unprecedented ripples throughout society, bringing many sectors and fields, including education, to a virtual halt or forcing them to change their working style abruptly. Based on technological advancements, e-learning preparedness, and human and financial resources, higher education systems and universities in Eastern and Western countries have responded differently to this crisis. Comparative Research on Educational Policy Responses to the COVID-19 Pandemic: Eastern vs. Western Perspectives presents global research on the response of higher education to the COVID-19 pandemic from both the East and the West. It sheds light on the relevant challenges, strategies, and effectiveness of the policies set in place in response to the pandemic. Covering topics such as international student-related policies, pedagogical adaptation, and student motivation, this premier reference source is an essential resource for policymakers, government officials, faculty of higher education, students and educators of higher education, libraries, researchers, and academicians.

This book constitutes the refereed proceedings of the 13th International Conference on Blended Learning, ICBL 2020, held in Bangkok, in August 2020. Hybrid Learning, Online Learning, Enriched and Smart Learning, Learning Management System and Content and Instructional Design.

The U.S. Departments of Commerce and Education (who co-chair the NSTC Working Group) and NetDay formed a partnership aimed at analyzing K-12 student views about technology for learning. These views are analyzed in this second report, "Visions 2020.2: Student Views on Transforming Education and Training Through Advanced Technologies." In October-November 2004, NetDay sponsored its "Speak-Up Day for Students" which offered online questionnaires, which asked K-12 students across the country about their use of technology. More than 160,000 students participated in answering questions; 38 percent of these students were in grades K-6, and 62 percent were students in grades 6-12. "Visions 2020.2" begins with an exploration of how today's K-12 aged youth--the so-called New Millennials--use digital technologies. The analysis then explores four themes commonly touched on in the students' answers: (1) Digital Devices; (2) Access to Computers and the Internet; (3) Intelligent Tutor/Helper; and (4) Ways to Learn and Complete School Work Using Technology. Math and reading were often cited specifically as subjects that might benefit from the use of learning technologies. For each of the four themes, selected student answers to the NetDay question are included to add richness to the themes and to give voice to the student views. In addition, for each theme, excerpts from the U.S. Department of Commerce publication "Visions 2020: Transforming Education and Training Through Advanced Technologies" are included. These vignettes envision the use of advanced technologies for learning in ways that are similar to those suggested by the students. (Contains 10 footnotes.).

Offers a practical guide for improving schools dramatically that will enable all students from all backgrounds to achieve at high levels. Includes assessment forms, an index, and a DVD.

Student and novice researchers may have a general idea for a topic they would like to research, but have a difficult time settling on a more specific topic and its associated research questions. Addressing this problem, this book features contributions from over thirty diverse and experienced research supervisors, mentors, and principal investigators in the field of language teacher education. The chapters are autobiographic in nature, with each contributing author reflecting on relevant, current and innovative research topics through the lens of their own professional life and research work. Offering explicit research topics and strategies for each area of expertise, this book will serve as a useful reference for the seasoned qualitative or narrative researcher, and a helpful guide for new researchers and teacher researchers narrowing down their own research topics.

This book constitutes selected, revised and extended papers from the 12th International Conference on Computer Supported Education, CSEDU 2020, held as a virtual event in May 2020. The 25 revised full papers were carefully reviewed and selected from 190 submissions. The presented papers contribute to the understanding of relevant trends of current research on Computer Supported Education, including learning analytics, intelligent tutoring systems, virtual and augmented reality, MOOCs, and automated assessment systems.
