It's no secret that the majority of wealth is tied to real estate. After experiencing success, my wife and I have become somewhat evangelical about real estate. Furthermore, this is a great way to build self-esteem, equity, and retirement for yourself and your family. If you're interested in a get-rich-quick scheme, put this book back on the shelf and pick up one of the many other books on the topic. I do not have seminars and progressive steps to my approach, at least not yet. What I have done, and my philosophy, is to provide a somewhat simple and realistic approach to property investing. Hopefully, you will see the benefit of property investing and try this on your own. Perhaps the greatest barrier to investing in property is overcoming fear. I am reminded of the Nike slogan from the eighties "Just do it." Whenever anyone incredulously asks me how I got into real estate, the simple answer is that I simply did.

No Fear Finance is an accessible guide to the essentials of the finance and investment sectors for individuals who may be approaching the subject for the first time, or who are coming to it from a non-finance background. Covering the fundamentals of finance - including an overview of business finance, the basics of accountancy, financial risk and investment vehicles - the book removes much of the fear experienced by many people when confronted with complex financial issues, and enables them to gain a clear understanding of the basic principles of finance, to which more complicated financial models can then be applied.

Successful trader and advisor Bill Kraft shows how to trade the financial markets in a way that limits risk and provides the potential for big profits. Kraft, who left a successful law practice to become an independent trader, explains his own educational process and how he arrived at a trading approach that primarily uses options to generate consistent income, limit risk, and participate in big market moves. In simple and down-to-earth language, Kraft explains a variety of strategies including buying and selling options; covered call writing; collars; using closed end mutual funds for income; debit spreads, volatility-based straddles; ratio backspreads; condors; and calendar spreads. Kraft emphasizes that traders need to first develop a sound and reasonable business plan ? in the same manner that any entrepreneur would plan a new business. Armed with the strategies explained in the book and a solid business plan, traders will have a blueprint for generating consistent profits in a relatively stress-free and efficient manner.

#1 NEW YORK TIMES BESTSELLER • " The clearest and best book out there to get you on the path to riches. This one 's special! " —Jim Cramer, host of CNBC 's Mad Money " Great tools for anyone wanting to dabble in the stock market. " —USA Today Phil Town is a very wealthy man, but he wasn 't always. In fact, he was living on a salary of \$4,000 a year when some well-timed advice launched him down a highway of investing self-education that revealed what the true " rules " are and how to make them work in one 's favor. Chief among them, of course, is Rule #1: " Don 't lose money. " In this updated edition to the #1 national bestseller, you 'll learn more of Phil 's fresh, think-outside-the-box rules, including: • Don 't diversify • Only buy a stock when it 's on sale • Think long term—but act short term to maximize your return • And most of all, beat the big investors at their own game by using the tools designed for them! As Phil demonstrates in these pages, giant mutual funds can 't help but regress to the mean—and as we 've all learned in recent years, that mean could be very disappointing indeed. Fortunately, Rule #1 takes readers step-by-step through a do-it-yourself process, equipping even the biggest investing-phobes with the tools they need to make quantum leaps toward financial security—regardless of where the market is headed.

Market swings are huge—3 of the top 12 in history in 2011 Interest rates are low—some of the lowest rates in history Financial products are more complicated—riskier than ever Advisors are not able to stabilize gains—no one can predict markets As prudent investors, not speculators, we need a way to make reasonable returns on our money. We want to build wealth. We know we can't squander our money in a 2% treasury or 1% CD. We don't have a huge account. We read how Wall Street makes its money these days—speculating with other people's money on derivatives. We don't want the Street's help. We have learned that most money managers are having a hard time beating the market averages. Managed funds are losing clients daily. We don't know who to trust to build wealth for us. Unless we are a wealthy insider, speculating on Wall Street is NOT for us. We are going to lose if we give them our money. Fees always have to be paid no matter how bad the returns. We have also learned that even cautious financial advisors are NOT any better at guessing the future of the markets than we are. Unless we have insider information, like Congress has, we are not going to know what specific securities to buy. We are stressed about losing money and about having enough for retirement. Fortunately, there is a " No Sweat " method of investing. We can use certain simple steps to build wealth for the long-term. Any person can grow their assets without the constant fear of making a bad choice and failure. "No sweat investing" lets our money do the work of building wealth. And we save advisor fees too! I was in financial services for over 25 years. I found that clients who don't try to chase the current hot investments come out better situated than those who do. Most "Working Millionaires" don't have time to worry about owning the top earning stocks or mutual funds. They let their money WORK for them. You can too.
