This comprehensive book has mainly and deliberately been designed to cater to the longfelt needs of the students studying in college and universities, including the prospective candidates for competitive exams.

Introduces readers to the dramatic events, notable people, and special customs and traditions that have shaped many of the world's countries, with each volume covering a specific country and offering a concise history of the struggles and triumphs of the peoples and cultures that have called that country home.

New edition of a text intended primarily for the undergraduate courses on the subject which are frequently found in electrical engineering curricula--but the concepts and techniques it covers are also of fundamental importance in other engineering disciplines. The book is structured to develop in parallel the methods of analysis for continuous-time and discrete-time signals and systems, thus allowing exploration of their similarities and differences. Discussion of applications is emphasized, and numerous worked examples are included. Annotation copyrighted by Book News, Inc., Portland, OR
