presentation developed by the Oxford Law courses are eminently suited to practical application, and employers recognise this. Oxford is one of the very few leading law schools in the world where the teaching mainly consists of small group discussion (tutorials) between one, two or three students and a tutor.

This third book in the Oxford Essays in Jurisprudence series continues the established format and includes contributions from distinguished scholars in the field, each attempting to relate legal theory to specific areas of the law. Among the eminent contributors are Andrew Ashworth, Peter Cane, Hugh Collins, Anne de Moor, Jim Harris, Simon Lee, Bernard Rudden, and Christopher McCrudden.

The book examines the protection of property rights in chattels through the law of torts, focusing on the four actions of conversion, detinue, trespass and negligence. Traditionally these actions have been governed by arcane divisions which have led to unnecessary complexity and arbitrariness. The principal argument made in the book is that significant developments in the modern law point towards abolition of these arcane divisions and permit the chattel torts to be understood by reference to a coherent and justifiable structure. It is argued that the only division which should be drawn in the modern chattel torts

is between intentional interferences with chattels, where liability is strict, and unintentional interferences with chattels, where liability is fault based. In order to demonstrate this structure it is first argued that the actions of conversion, detinue and trespass amount, in substance, to a single cause of action which imposes strict liability for the intentional interference with another's chattel. It is then argued that the tort of negligence recognises a fault-based cause of action for the unintentional interference with another's chattel. It is further argued that this basic structure, unlike the arcane divisions which have traditionally governed this area of law, can be justified.

An authoritative course text designed to provide a standalone resource for students. It contains a blend of carefully selected key cases, legislation and academic debate linked by substantial author commentary.

A rigorous introduction to profound questions about the nature and role of law.

The eighteenth edition of this classic work on land law has been fully updated and revised to ensure that it presents the modern law of real property - the land law of the twenty-first century - whilst setting the modern law in the context of its historical foundations.

This volume brings together essays by scholars from around the world covering issues in general private law theory as well as specific fields including the theoretical analysis of tort law, property law, and contract law.

the philosophy of law, and an authoritative restatement of natural law doctrine. It has offered generations of students and other readers a thorough grounding in the central issues of legal, moral, and political philosophy from Finnis's distinctive perspective. This new edition includes a substantial postscript by the author, in which he responds to thirty years of discussion, criticism and further work in the field to develop and refine the original theory. The book closely integrates the philosophy of law with ethics, social theory and political philosophy. The author develops a sustained and substantive argument; it is not a review of other people's arguments but makes frequent illustrative and critical reference to classical, modern, and contemporary writers in ethics, social and political theory, and jurisprudence. The preliminary First Part reviews a century of analytical jurisprudence to illustrate the dependence of every descriptive social science upon evaluations by the theorist. A fully critical basis for such evaluations is a theory of natural law. Standard contemporary objections to natural law theory are reviewed and shown to rest on serious misunderstandings. The Second Part develops in ten carefully structured chapters an account of: basic human goods and basic requirements of practical reasonableness, community and 'the common good'; justice; the logical structure of rights-talk; the bases of human rights, their specification and their limits; authority, and the formation of authoritative rules by non-authoritative persons and procedures; law, the Rule of Law, and the derivation of laws from the principles of practical reasonableness; the complex relation between legal and moral obligation; and the practical and theoretical problems created by unjust laws. A final Part develops a vigorous argument about the relation between 'natural law', 'natural theology' and 'revelation' - between moral concern and other ultimate questions.

discussion of the distinctive teaching of American and Scandinavian jurisprudence; an examination of theories of basic human rights and the notion of "social solidarity," and essays on Jhering, Kelsen, Holmes, and Lon Fuller.

John Finnis has been a central figure in the fundamental re-shaping of legal philosophy over the past half-century. This volume of his Collected Essays shows the full range and power of his contributions to the philosophy of law. The volume collects nearly thirty papers: on the foundations of law's authority; major theories and theorists of law; legal reasoning; revolutions, rights and law; and the logic of law-making. The essays collected include Finnis' recent appreciations and root-and-branch critiques of Hart's legal and political theories, his engagements with other central figures and works in the field, including Dworkin's *Law's Empire*; Raz on authority and coordination; Coleman, Leiter and Gardner on legal positivism and naturalism; Aquinas as founder of legal positivism; Weber on the fact-value distinction and legitimation; Unger on indeterminacy in law; Posner on intention and economics; Kelsen and courts on revolutions; game-theory and rational-choice theory; with misinterpreters of Hohfeld on rights logic; John Paul II on voting for unjust laws; analogy's role in legal reasoning; the distribution of constitutional authority in the *Empire* and its dissolution; the judicial opportunism of separation of powers doctrine in the Australian constitution; the architecture of Blackstone's *Commentaries*; restitution in civil wrongs; and many other aspects of law and legal theory. Several papers bring to bear his extensive work as a constitutional adviser and lawyer on persistent problems of constitutional theory. Previously unpublished papers include two on critical or post-modern legal theory, and an introduction reflecting on legal philosophy's development and future.
