This mini-textbook uses the same successful question-and-answer format of the Secrets(R) series and covers all the latest treatments for a wide variety of neoplastic disease. Sections cover general concepts, general hematology, a new addition, cancer genetics. This edition also includes malignant hematology, general care of the cancer patient, solid tumors, pediatric oncology, HIV-related diseases, and new and updated chapters that address the legal and psychosocial aspects of cancer care, such as end-of-life decision making and managing depression.

You asked for a new edition. Here it is, better than ever! Not only have many of the same experts in hematology and oncology returned to update their chapters, but new specialists have joined the team, rounding out this edition's detailed coverage of cancer treatment, palliative care, blood disorders, genetic counseling, and more. New to this edition are: skeletal complications of malignancy, fatigue in the cancer patient, and targeted molecular therapy. Freshen your knowledge base, study for the boards, or read for the challenge of testing yourself. - Back cover.
