Lesson 5 7 Reteach The Pythagorean Answers

$4^2 + 1^2 = c^2$  Simplify.  $17 = c^2$ .  $c = \sqrt{17}$  Take the square root. The length of the hypotenuse is  $\sqrt{17}$ . The lengths of the sides, 4, 1, and  $\sqrt{17}$ , form a Pythagorean triple because they are whole numbers that satisfy  $a^2 + b^2 = c^2$ . A right triangle has a hypotenuse of length 25 and a leg of length 10. Find the length of the other leg.

struggle with the most. The topics are explained in everyday language before the examples are worked. The problems are solved clearly and systematically, with step-by-step instructions provided. Problem-solving skills and good habits, such as checking your answers after every problem, are emphasized along with practice problems throughout, and the answers to all of the practice problems are provided. Homework Helpers: Basic Math and Pre-Algebra is a straightforward and easy-to-read review of arithmetic skills. It includes topics that are intended to help prepare students to successfully learn algebra, including: Working with fractions Understanding the decimal system Calculating percentages Solving linear equalities Graphing functions Understanding word problems

Easy to apply lessons for reteaching difficult algebra concepts Many students have trouble grasping algebra. In this book, bestselling authors Judith, Gary, and Erin Muschla offer help for math teachers who must instruct their students (even those who are struggling) about the complexities of algebra. In simple terms, the authors outline 150 classroom-tested lessons, focused on those concepts often most difficult to understand, in terms that are designed to help all students unravel the mysteries of algebra. Also included are reproducible worksheets that will assist teachers in reviewing and reinforcing algebra concepts and key skills. Filled with classroom-ready algebra lessons designed for students at all levels The 150 mini-
