Scalping Is Fun! Part 4: Trading Is Flow Business Trading profits are not equal on the 20 trading days of each month as a regular office job probably would. Experience shows that the results are asymmetrical in occurrence. There are days where it runs like clockwork and days on which trading seems to produce only losses. In this fourth installment of the series "Scalping Is Fun!" The Heikin Ashi Trader looks at the right time to trade. Successful traders know in specifics when not to trade. They focus on the times when market conditions are optimal for them. In order of events, the fun turns by itself, then the success follows suit. In this state of "flow" discipline, this is easy to achieve. Fast scalping promotes the rapid close of loss positions and the quick takeaway from accrued profits, also of equal importance. Index 1. Only Trade When it's Fun 2. When Not to Trade 3. The Best Trading Hours For: A. Forex Traders B. Index Traders C. Crude Traders 4. Why Fast Scalping is Better than a Few Well-considered Trades 5. Swing Trading using the 4-hour chart 1-3: 3 Manuscripts Swing trading is too fast for investors and too slow for day traders. It takes place on a timeframe in which you will find very few professional traders. Swing traders usually use 4-hour charts. This period falls exactly between that of the investor and the day trader. As a swing trader, you are prone to sit on the fence, and that's good, because here you are almost alone. This book describes the swing trading method of the Heikin Ashi Trader. It is ideal for individual investors who do not want to sit all day in front of the computer screen. Part 1: Introduction to Swing Trading 1. Why Swing Trading? 2. Why should you trade using the 4-hour chart? 3. Which markets are suitable for swing trading? 4. What instruments you can swing trade? 5. Swing Trading Setups A. Support and Resistance B. double top and double bottom C. breakouts D. flags and pennants 6. Money Management 7. Why you need a Trading Diary 8. What is it all about? Part 2: Trade the Fake! In the second part of the series "Swing Trading using the 4-hour chart" the Heikin Ashi Trader speaks about the phenomenon of stop fishing and Fakeouts as well as the many deceptions that major players and algorithms stage in today's financial markets. These often seem more the rule than the exception. 1. A feint at its finest! 2. How to identify fakes? 3. How do I trade Fakes? 4. Fakes at technical chart patterns A. flags B. triangles C. Trend Channels 5. Trading cross rates 6. More complex patterns Glossary Part 3: Where Do I Put My Stop? In the third part of the series on "Swing Trading using the 4-hour chart", the Heikin Ashi Trader treats the question on where the stop should be. Once a trader stops introducing stops, he will discover that his hit rate will worsen. However, by doing this he gains full control of the trade management. Stops are therefore not unavoidable, but remain an integral part of a trading system that is profit-oriented. Table of Contents 1. Are Stops Necessary? 2. What Is a Stop Loss Order? 3. Stop Management 4. Play Your Own Game 5. Cut Your Losses 6. And Let your Profits Run 7. Stop Management in Trending Markets 8. Stop Management with Price Targets 9. The Swiss Franc Tsunami, a Healing Moment of the Trader Community 10. How Many Positions Can I Keep at the Same Time? Glossary

Condensed stats can be found at - linkpony.com/97stats - with a link to full statistics included in Chapter 6 In this book, best-selling, no-BS, finance author Tim Morris goes over a swing trading strategy which he has coined The 97% Swing Trade. By proving the results with over 10 years of data, which include multiple corrections and the crash of 2020, Tim lays out a swing trading strategy that has a 17.50% annual return, an average trade duration of just 10 days, and a 97.71% win rate (with all statistics shown in Chapter 6). There are no special programs, confusing algorithms, or

costly subscriptions required. Everything needed to use this strategy is free on FinViz! Here's the concept behind the trade: Use the free website FinViz to find the stocks which are eligible to trade (which takes less than 5 minutes). Put in your order and wait for it to get executed. Once executed, sell at the exact exit point Tim provides. You may have read some books where you could spend hours searching for a good setup. Who wants to do that? This trade is limited to just a handful of stocks, which take all of 5 minutes to find on your computer. This is easily done on the website FinViz, which Tim of course shows you how to do in the book. Tim includes detailed charts, trading examples, and statistics to help you understand the concepts behind the strategy. He also gives you the exact entry and exit points, and even where to set your stop loss. Meaning you know exactly where to get in and get out. No guess work! It really can't get any simpler than the strategy Tim shows you in this book!

As a complimentary bonus, only for book buyers, you'll receive Tim's special report titled Crush the Market. This special report is packed with 14 incredibly beneficial tips to help you make money in the stock market! This report is not available to the general public, or anywhere else. It exists solely as a "thank you" to buyers of this book.

The brokerage industry usually recommends that new traders trade with the trend. But is trading this way profitable? It is said that if you go with the trend, the likelihood that you will win is higher. Unfortunately, experience shows that most traders cannot build a profitable business this way. Old and experienced traders used to say: You have to buy when blood flows in the streets. That means that you should act against the trend. Actually, this saying is the expression of common sense itself. The question remains: Why do traders find it so hard to put this wisdom into practice? The new book by Heikin Ashi Trader gives ideas and tips on how to recognize such countertrend signals in the stock market, since these are usually the best trading opportunities. Table of Contents Part 1: The Snapback Trading Strategy Chapter 1: Trade when the mass is afraid Chapter 2: Why I do not follow the trend Chapter 3: Mean Reversion Chapter 4: Risk Management Chapter 5: How do I recognize extreme movements? Chapter 6: Patience at the entry Chapter 7: Does the stop really protect me from heavy losses? Chapter 8: Trade Management Chapter 9: Exit Chapter 10: When do the best trading opportunities occur? Chapter 11: Why you should study the economic calendar Chapter 12: Which markets are suitable for the snapback strategy? Part 2: Trading Examples Chapter 1: Examples in the stock indices Chapter 2: Examples in the currency markets (Forex) Chapter 3: Examples in the stock markets Chapter 4: Examples in the commodity markets Glossary
