If you were born before 1990, this may be the most valuable financial message you ever read... Something incredible is happening right now... An entirely new asset class is being created... One that is making more people rich than any other financial market. For example... If you had invested just \$100 in Bitcoin on January 1st 2017, you'd have \$1004 today - not bad right? What about if you'd also put \$100 into Ethereum on the same day? Well you'd have over \$8,500. Let's do one more. \$100 in Ripple on January 1st 2017 would be worth a staggering \$14,300 today. That's over a \$20,000 return from a \$300 investment. Or over \$200,000 if you'd put in \$3,000. A life changing amount of money. You won't find these kinds of returns in the stock market. Or any other financial market. And this is just the beginning. Now we're seeing real world adoption from leading financiers to governments to investment banks. And what you may not know is, private investments in blockchain companies have increased by 800% in the past 12 months. We're gearing up to profit from the upcoming stock market crash. Are you? Dear investor, What I'm about to tell you SUCKS. But not listening to this message will affect your financial future. In fact, ignoring this advice could cost you thousands, tens of thousands or even hundreds of thousands of dollars - depending on the size of your portfolio. You see, within the next 36 months there will be a stock market crash. All indicators show this is now a matter of when, rather than if. Wages are stagnating across the country. And the housing supply is beginning to outpace demand for the first time since 2008. These aren't just my opinions. They are shared by many Wall Street experts, including billionaire investors like Jim Rogers and Doug Casey. What's more alarming is... The numbers indicate this crash will be worse than 2008. Which wiped out over \$7 trillion dollars of investor money. So leaving your portfolio exposed... Will cause you to lose money faster than if you threw it off the edge of a cliff! However, it's not all doom and gloom. A few select investors, considered the smartest in the world...will not just survive the crash... They will thrive in the crash. For years their secrets have been closely guarded... But now you can benefit from the exact same strategies they use to protect...and even grow their wealth in a market downturn. The same strategies you can use to bulletproof your retirement. Strategies including: The "3 Rs"

If you've heard a lot about cryptocurrency but never understood any of it, then you'll want to listen very carefully to what I'm about to explain to you next... My name is Keith Coleman and I'm a three star Sharpe ratio investor, digital entrepreneur and now even an author. What does all of these traits have in common? Knowledge, self-discipline and simple but proven guidelines/techniques that you can follow! And I dare to outright promise you, that by the end of this book you'll know what cryptocurrency is, why you should even use it and how to use it. You'll be in a great position to start investing in cryptocurrencies and more importantly, invest wisely! Interested? If so, keep reading Unless you've been hiding in a cave or have gone all hermit mode, there's no doubt that much of the success of cryptocurrencies, in general, can be credited to the granddaddy of all cryptocurrencies, Bitcoin! Now consider what happened to Bitcoin in December 2017, whose average market prices shot by as much as 400% in just a couple of weeks! It's practically impossible to earn that much on stock investments, even on growth stocks! While it may seem that cryptocurrencies are too good to be true, they aren't. It has its own share of potential dangers. If you invested most - if not all - of your investable money in Bitcoin in December, you may be bashing your head on the wall by January 2018, when its prices fell by more than 40% from its December peak! And rightly so, if I may add because it would've probably crippled your personal or family finances! While the risk of registering hugely negative rates of return on your cryptocurrency investments can't be lowered, its financial impact on you and your family can be significantly reduced. With the right strategies that we'll discuss in this book in more detail, these possible dangers can be managed well and their chances of materializing can be lowered. And the funny thing about these possible dangers is that 2 of these happen to be its top reasons for investing too! What successful people in the industry are saying "When I first heard about Bitcoin, I thought it was impossible. How can you have a purely digital currency? Can't I just copy your hard drive and have your bitcoins? I didn't understand how that could be done, and then I looked into it and it was brilliant" - Jeff Garzik, Co-Founder of Bloq Inc. Bitcoin developer "There's a big industry around Bitcoin. People have made fortunes off Bitcoin, some have lost money. It is volatile, but people make money off of volatility too" - Richard Branson, Founder of Virgin Galactic "[Bitcoin] is a remarkable cryptographic achievement... The ability to create something which is not duplicable in the digital world has enormous value... Lots of people will build businesses on top of that." - Eric Schmidt, Executive Chairman of Google Simple guidelines for smart investing!
