The Instant New York Times Bestseller and TikTok Sensation! As seen on THE VIEW! A BuzzFeed Best Summer Read of 2021 When a fake relationship between scientists meets the irresistible force of attraction, it throws one woman's carefully calculated theories on love into chaos. As a third-year Ph.D. candidate, Olive Smith doesn't believe in lasting romantic relationships—but her best friend does, and that's what got her into this situation. Convinced Anh that Olive is dating and well on her way to a happily ever after was always going to take more than hand-wavy Jedi mind tricks: Scientists require proof. So, like any self-respecting biologist, Olive panics and kisses the first man she sees. That man is none other than Adam Carlson, a young hotshot professor—and well-known ass. Which is why Olive is positively floored when Stanford's reigning lab tyrant agrees to keep her charade a secret and be her fake boyfriend. But when a big science conference goes haywire, putting Olive's career on the Bunsen burner, Adam surprises her again with his unyielding support and even more unyielding...six-pack abs. Suddenly their little experiment feels dangerously close to combustion. And Olive discovers that the only thing more complicated than a hypothesis on love is putting her own heart under the microscope.

A USA Today Bestseller! From the New York Times bestselling author of The Love Hypothesis comes a new steamy, STEMinst novella... A scientist should never cohabitate with her annoyingly hot nemesis—it leads to combustion. Mara, Sadie, and Hannah are friends first, scientists always. Though their fields of study might take them to different corners of the world, they can all agree on this universal truth: when it comes to love and science, opposites attract and rivals make you burn... As an environmental engineer, Mara knows all about the delicate nature of ecosystems. They require balance. And leaving the thermostat alone. And not stealing someone else's food. And other rules Liam, her detestable big-oil lawyer of a roommate, knows nothing about. Okay, sure, technically she's the interloper. Liam was already entrenched in his aunt's house like some glowering grumpy giant when Mara moved in, with his big muscles and kissable mouth just sitting there on the couch tempting respectable scientists to the dark side...but Helena was her mentor and Mara's not about to move out and give up her inheritance without a fight. The problem is, living with someone means getting to know them. And the more Mara finds out about Liam, the harder it is to loathe him...and the easier it is to love him. To read Sadie and Hannah's stories look for the novellas Stuck with You and Below Zero, coming soon from Berkley!

Welcome to Melissa Albert's The Hazel Wood—the fiercely stunning New York Times bestseller everyone is raving about! Seventeen-year-old Alice and her mother have spent most of Alice's life on the road, always a step ahead of the uncanny bad luck biting at their heels. But when Alice's grandmother, the reclusive author of a cult-classic book of pitch-dark fairy tales, dies alone on her estate, the Hazel Wood, Alice learns how bad her luck can really get: Her mother is stolen away—by a figure who claims to come from the Hinterland, the cruel supernatural world where her grandmother's stories are set. Alice's only lead is the message her mother left behind: "Stay away from the Hazel Wood." Alice has long steered clear of her grandmother's cultish fans. But now she has no choice but to ally with classmate Eilery Finch, a Hinterland superfan who may have his own reasons for wanting to help her. To retrieve her mother, Alice must venture first to the Hazel Wood, then into the world where her grandmother's tales began—and where she might find out how her own story went so wrong. Don't miss the New York Times bestselling sequel to The Hazel Wood, The Night Country, out now, or Tales from the Hinterland, coming January 12, 2021!

From the New York Times bestselling author of The Love Hypothesis comes a new steamy, STEMinst novella... Nothing like a little rivalry between scientists to take love to the next level. Mara, Sadie, and Hannah are friends first, scientists always. Though their fields of study might take them to different corners of the world, they can all agree on this universal truth: when it comes to love and science, opposites attract and rivals make you burn... Logically, Sadie knows that civil engineers are supposed to build bridges. However, as a woman of STEM she also understands that variables can change, and when you are stuck for hours in a tiny New York elevator with the man who broke your heart, you earn the right to burn that brawny, blond bridge to the ground. Erik can apologize all he wants, but to quote her rebel leader—she'd just as soon kiss a Wookiee. Not even the most sophisticated of Sadie's superstitious rituals could have predicted such a disastrous reunion. But while she refuses to acknowledge the siren call of Erik's steely forearms or the way his voice softens when he offers her his sweater, Sadie can't help but wonder if there might be more layers to her cold-hearted nemesis than meet the eye. Maybe, possibly, even burned bridges can still be crossed.... To read Mara and Hannah's stories look for the novellas Under One Roof, available now, and Below Zero, coming soon from Berkley!

From the New York Times bestselling author of The Love Hypothesis comes a new STEMinst rom-com in which a scientist is forced to work on a project with her nemesis—with explosive results. Like an avenging, purple-haired Jedi bringing balance to the mansplained universe, Bee Königswasser lives by a simple code: What would Marie Curie do? If NASA offered her the lead on a neuroengineering project—a literal dream come true after years scraping by on the crumbs of academia—Marie would accept without hesitation. Duh. But the mother of modern physics never had to co-lead with Levi Ward. Sure, Levi is attractive in a tall, dark, and piercing-eyes kind of way. And sure, he caught her in his powerfully corded arms like a romance novel hero when she accidentally damed in distress on her first day in the lab. But Levi made his feelings toward Bee very clear in grad school—archenemies work best employed in their own galaxies far, far away. Now, her equipment is missing, the staff is ignoring her, and Bee finds her floundering career in somewhat of a pickle. Perhaps it's her occipital cortex playing tricks on her, but Bee could swear she can see Levi softening into an ally, backing her plays, seconding her ideas...devouring her with those eyes. And the possibilities have all her neurons firing. But when it comes time to actually make a move and put her heart on the line, there's only one question that matters: What will Bee Königswasser do?

Teenage Gerald, who has spent years protecting his fragile half-sister from their abusive father, faces the prospect of one final confrontation before the problem can be solved.

Andy tackles his guilt and grief in the first book of Sharon M. Draper's award-winning Hazelwood High trilogy. Tigers don't cry—or do they? After the death of his longtime friend and fellow Hazelwood Tiger in a car accident, Andy, the driver, blames himself and cannot get past his guilt and pain. While his other friends have managed to work through their grief and move on, Andy allows death to become the focus of his life. In the months that follow the accident, the lives of Andy and his friends are traced through a series of letters, articles, homework assignments, and dialogues, and it becomes clear that Tigers do indeed need to cry.

Please note: This is a companion version & not the original book. Sample Book Insights: #1 The FBI's Behavioral Science Unit has studied aberrant crime, and I spent 16 years examining these crimes as part of that group. I chose to focus on previously unexplored or poorly understood deviant behaviors. There are no boundaries to what a particular individual might do to other people or to themselves. #2 There is a wide variety of human behaviors when it comes to sex crimes. Some people are attracted to nonliving objects, animals, or people. Others are drawn to all three. Some commit exclusively homosexual crimes, others only heterosexual ones, and still others are attracted to either gender. #3 The distinction between what is acceptable and what is not may depend on the jurisdiction where the behavior takes place. In some cases, it can be difficult to draw the line between criminal and noncriminal sexual behavior. #4 The monster who committed these heinous crimes was a well-groomed, middle-aged man. He looked like a pervert, and people were shocked when they saw his pictures.

Newbery Medal-winner Kelly Barnhill's debut novel is an eerie tale of magic, friendship, and sacrifice. Enter a world where magic bubbles just below the surface... When Jack is sent to Hazelwood, Iowa, to live with his strange aunt and uncle, he expects a summer of boredom. Little does he know that the people of Hazelwood have been waiting for him for quite a long time. When he arrives, he begins to make actual friends for the first time in his life-but the town bully beats him up and the richest man in town begins to plot Jack's imminent, and hopefully painful, demise. It's up to Jack to figure out why suddenly everyone cares so much about him. Back home he was practically... invisible. The Mostly True Story of Jack is a stunning debut novel about things broken, things put back together, and finding a place to belong. "There's a dry wit and playfulness to Barnhill's writing that recalls Lemony Snicket and Blue Balliett...a delightfully unusual gem." --Los Angeles Times

The Evil That Men Do introduced readers to the lifework and the techniques of FBI profiler Roy Hazelwood. Now, in Dark Dreams, Hazelwood-- writing with bestselling author Stephen G. Michaud-- will take then deep into the minds of his prey, the world's most dangerous sexual criminals, and reveal the extent to which these individuals permeate our society. Profiler Roy Hazelwood is one of the world's leading experts on the strangest and most dangerous of all aberrant offenders-- the sexual criminal. In Dark Dreams he reveals the twisted motive and thinking that go into the most reprehensible crimes. He also catalogs the innovative and remarkably effective techniques-- investigative approaches that he helped pioneer at the FBI's Behavioral Science Unit-- that allow law enforcement agents to construct psychological profiles of the offenders who commit these crimes. Hazelwood has helped track down some of the most violent and well-known criminals in modern history; in Dark Dreams he takes readers into his world-- a sinister world inhabited by scores of dangerous offenders for every Roy Hazelwood who would put them behind bars: * A young woman disappears from the convenience store where she works. Her skeletonized remains are found in a field, near a torture device. Who committed this heinous crime? And why? * A teenager's body is found hanging in a storm sewer. His clothes are neatly folded by the entrance and a stopwatch is found in his mouth. Is he the victim of a bizarre, ritualistic murder...or an elaborate masturbatory fantasy gone awry? * A married couple, driving with their toddler in the backseat, pick up a female hitchhiker. They kidnap her and for seven years keep her as a sexual slave. The wife agreed to this inhuman arrangement in exchange for having a second child. Who was to blame? As gruesome as the crimes are and as unsettling as the odds seem, Hazelwood proves that the right amount of determination and logic can bring even the most cunning and devious criminals to justice. Dark Dreams is a 2002 Edgar Award Nominee for Best Fact Crime.
