Here are three example to get you started: 1) Text.

This is the comprehensive guide to buying and using the latest hardware and software to improve the speed and quality of work at your firm or law department. Up-to-date and practical, Automated Law Firm: A Complete Guide to Software and Systems provides specific advice and cost-benefit analysis of today's technological options, including coverage of new and developing areas such as imaging systems, workflow software, portable technology, voice technology, personal information managers, legal research on the Internet, and recommended software security features such as passwords, file locking, and access control.You select the best products to improve your office efficiency - without having to spend the time to become an expert yourself. Each system is fully described, and its features and functions listed in an easy-to-use chart format along with new comparison charts of software products to help you choose the system that best matches your firm or department's specific needs. A Frequently Asked Questions (FAQ) section at the end of each chapter offers you clear, concise answers to important everyday questions, and vendor and software directories help you speed your search in selecting the software that is right for you. Extensive attention is given to software in vital areas such as litigation support and databases, document generation and management, property closings, bankruptcy, estate practice, billing, and corporate law office programs.

"The world's fourth industrial revolution-automation through the growth of robotics, artificial intelligence, blockchain, and virtual ecommerce-will disrupt the legal industry. By being open to this change, lawyers can eliminate repetitive, inefficient processes so they can increase the speed, quality, and scale of their legal services. In addition to bolstering the business of law for both big and small firms, this automation will increase access to justice for those who need it most. This book sets out different models and details what firms, lawyers and society, can gain from automated legal services"--

Discover how artificial intelligence can improve how your organization practices law with this compelling resource from the creators of one of the world 's leading legal AI platforms.
