Water shortages and water rationing are commonplace throughout California, rendering expanses of lawn and thirsty, nonnative plants unsustainable. The California Native Landscape addresses both concerns by showing homeowners how to succeed with natives and showing them how lush, colorful, and thriving their landscape can be. The authors stress the importance of smart garden design and combining the right plants to promote the natural symbiosis that occurs within plant communities. Native plants also play an important role in creating fire-resistant landscapes, and this new book has cutting-edge information on this crucial topic, refuting the myth that natives are more fire-prone than nonnatives. With its unique combination of proven techniques, environmental wisdom, and inspiring design advice, this is an essential resource for all California gardeners who want to create a beautiful, ecologically appropriate, and resource-conserving home landscape.

Plants native to Southern California are uniquely beautiful and thrive on their own with minimal water, pruning or trimming, fertilizers, and soil amendments. This book proves that creating environmentally sensitive design does not mean putting in extraordinary effort or sacrificing beauty. Includes detailed descriptions and growing information for some of the region's most interesting, attractive plants and has easy-to-use tri-cut flip pages.

"California Native Plants for the Garden" is a comprehensive resource that features more than 500 of the best California native plants for gardening in the Mediterranean-climate areas of the world. Judith Lowry's voice and experiences make a rich matrix for essays that include discussions of wildflower gardening, the ecology of native grasses, wildland seed-collecting, principles of natural design, and plant/animal interactions. This lyrical and articulate mix of the practical and the poetic combines personal story, wildland ecology, restoration gardening practices, and native plant horticulture.

A must-have for every gardener in California looking for a new way to garden in a changing climate In recent years California has been facing extreme drought, and in 2015 they passed state-wide water restrictions that affect home owners. Unfortunately the drought is only going to get worse, and gardeners who aren't willing to abandon their beloved pastime entirely are going to have to learn how to garden with the absolute minimum of water. The Drought-Defying California Garden highlights the best 230 plants to grow, shares advice on how to get them established, and offers tips on how to maintain them with the minimum amount of water. All of the plants are native to California—making them uniquely adept at managing the harsh climate—and include perennials, annuals, shrubs, trees, and succulents.
