In the health and fitness industry truth is a scarce commodity, charges Dr. Larry M. Forness. American consumers, exposed to a daily barrage of hype and misinformation about all the products and services that claim to make them healthier and more attractive, annually spend forty billion dollars needlessly on a cornucopia of vitamins, minerals, herbal supplements, ergogenic aids, fitness equipment, and alternative healthcare treatments. In this "survival manual," Forness's goal is to teach consumers the critical tools to make them more knowledgeable about these questionable items. The topics covered include the real meaning of "scientifically proven,"

methods for quantitatively analyzing such claims as "more energy" and "improved strength," alternative healthcare treatments vs. hard science, fad diets, aging remedies, abuse of the labels "certified" and "licensed," plus an extremely useful glossary explaining commonly used marketing terms. To reinforce his message, Forness has originated the "Bozo du Jour Award," bestowed on various individuals, groups, or companies that have created or participated in misleading advertising, or have done something that could harm consumers. Before you begin yet another weight loss or fitness program or buy the next healthcare product, you owe it to yourself to read what Dr. Forness

has to say.

Each year approximately 250,000 Americans undergo total-knee-replacement surgery (also known as a total knee arthroplasty, or TKA). Every year, a million more consider it. If you are considering or have had a total knee replacement you should read this

book. It will tell you everything you need to know to prepare for and recover from the surgery, and to get the most out of your new knee. The success of a total knee replacement depends on rehabilitating the knee after the operation -- in fact, the rehab is as important as the surgery itself. This book maps out the road to recovery with week-by-week exercises for a full year. The authors, a surgeon and physical therapist who have both been orthopedic patients, provide practical tips, success stories and personal insights into the recovery process. Most people, even surgeons, don't realize how dramatically arthritis can change a person's life. Author Jeff Falkel, Ph.D., was one of these people.

Over the course of 20 years his knees had gotten progressively worse, and eventually the pain reached the point where it was present in every aspect of his life. He could not stand or walk without crippling pain.

More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide.
