This book, first published in 1987, is about the classic free will problem, construed in terms of the implications of moral responsibility. The principal thesis is that the core issue is metaphysical: can scientific laws postulate objectively necessary connections between an action and its causal antecedents? The author concludes they cannot, and that, therefore, free will and determinism can be reconciled.

Does your life need a boost? Are you on the verge of giving up? Do you feel lost and hopeless about the direction of your life? The Bible says, "God is love." (1 John 4:16) The experience of God's love will strengthen faith. In turn, fueled by the power of His love, one builds the necessary faith to stay the course. Author Robert F. Moore meditated on the meaning of life for a year, and the result is Faithbook: Faith Through the Love of God. At its core, it's an everyman journey seeking the answer to the question: Why am I here? His compact and deeply personal essays on topics like the nature of sin and the power of love reveal not only why it is important to read the Bible, but also how to do so. Armed with the meaning behind biblical passages, readers will rediscover the Bible as a contemporary reference book for living, complete with the answers to questions they're seeking. Faithbook is a call to action for the average person hungry for wisdom and open to an energized approach to faithful living.
